Commission Workshops

Based on the FY 14-15 work plan, the Commission held a workshop on August 13, 2014 to discuss the status of special districts, their current challenges and options available to the Commission. The workshop, public testimony, and Commission direction to staff was instrumental to the development of the MSR Guidelines approved by the Commission in November, 2014.

The current workshop will focus on special district's compliance with their respective principal acts, accountability and transparency, and options available to the Commission to use its statutory powers to address districts' inactivity. Public comment will be solicited after staff's presentation.

This workshop has been noticed to all special districts in Fresno County.

The Commission will be provided with copies of the PowerPoint slides prior to the workshop.
