1.1 INTRODUCTION AND REGULATORY GUIDANCE

This document is an Initial Study and Negative Declaration (ND) prepared pursuant to the California Environmental Quality Act (CEQA), for the Project. This ND has been prepared in accordance with the California Environmental Quality Act (CEQA), Public Resources Code Sections 21000 *et seq.*, and the CEQA Guidelines.

If a project is not otherwise statutorily or categorically exempt from CEQA, an Initial Study is conducted by a lead agency to determine if a project may have a significant effect on the environment. In accordance with the CEQA Guidelines, Section 15064, an environmental impact report (EIR) must be prepared if the Initial Study indicates that the proposed project under review may have a potentially significant impact on the environment. A negative declaration may be prepared instead, if the lead agency prepares a written statement describing the reasons why a proposed project would not have a significant effect on the environment, and, therefore, why it does not require the preparation of an EIR (CEQA Guidelines Section 15371). According to CEQA Guidelines Section 15070, a negative declaration shall be prepared for a project subject to CEQA when either:

- a) *The Initial Study shows there is no substantial evidence, in light of the whole record before the agency, that the proposed project may have a significant effect on the environment, or*
- b) *The Initial Study identified potentially significant effects, but:*
 - (1) *Revisions in the project plans or proposals made by or agreed to by the applicant before the proposed negative declaration is released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur, and*
 - (2) *There is no substantial evidence, in light of the whole record before the agency, that the proposed project as revised may have a significant effect on the environment.*

If the Initial Study reveals that there may be significant effects upon the environment, but those effects can be avoided or reduced to a less than significant level with revisions to the project plans and/or mitigation measures, and the applicant agrees to the revisions and/or mitigation measures, the agency may prepare a mitigated negative declaration (Guidelines Sections 15070(b), 15071(e)).

1.2 LEAD AGENCY

The lead agency is the public agency with primary responsibility over a proposed project. Where two or more public agencies will be involved with a project, CEQA Guidelines Section 15051 provides criteria for identifying the lead agency. In accordance with CEQA Guidelines Section 15051(b)(1), "the lead agency will normally be the agency with general governmental powers, such as a city or county, rather than an agency with a single or limited purpose." Based on these criteria, the City of Clovis will serve as lead agency for the proposed project.

1.0 INTRODUCTION

1.3 AGENCIES THAT MAY USE THIS DOCUMENT

This Initial Study and Negative Declaration may be used by any responsible or trustee agencies that also have review authority over the project. As stated in the CEQA Guidelines Section 15231:

A Final EIR prepared by a lead agency or a Negative Declaration adopted by the lead agency shall be conclusively presumed to comply with CEQA for the purposes of use by responsible agencies which were consulted pursuant to Sections 15072 or 15082 unless one of the following conditions occurs:

- a. *The EIR or Negative Declaration is finally adjudged in a legal proceeding not to comply with the requirements of CEQA, or*
- b. *A subsequent EIR is made necessary by Section 15162 of these Guidelines.*

The various local, state, and federal agencies that may use this document are listed in Section 2.0, "Project Description."

1.4 DOCUMENTS INCORPORATED BY REFERENCE

This mitigated negative declaration utilizes information and incorporates information and analyses provided in the following documents pursuant to CEQA Guidelines Section 15150.

- **City of Clovis General Plan.** The 2014 Clovis General Plan provides a description of the project area setting, and sets forth a plan for the development of the general plan planning area, of which the current project area is part.
- **Program Environmental Impact Report prepared for the Clovis General Plan** The General Plan Program EIR describes potential impacts of development of the project area consistent with the general plan land use map. Some of these impacts (e.g. runoff, aesthetics, etc.) are to be expected with any urban development, and are therefore applicable to the current project.
- **Findings and Statement of Overriding Considerations prepared for the adoption of the Clovis General Plan.** Adoption of the development plan contained in the General Plan is expected to result in certain unavoidable environmental impacts (Agriculture, Air Quality, Cultural Resources, Greenhouse Gas, Hydrology and Water, Noise and Vibration, Population and Housing, Transportation and Traffic, and Utility and Service Systems) that the City has determined are outweighed by the potential benefits of plan implementation. These impacts are applicable to the project at hand due to the fact that the proposal is consistent with the planned urbanization of the general plan planning area.
- **Loma Vista Specific Plan.** The Southeast Urban Center Specific Plan provides a description of the project area setting, and sets forth a plan for the development of the specific plan planning area, of which the current project area is part.

- **Environmental Impact Report prepared for the Loma Vista Specific Plan (Certified March 3, 2003, SCH No. 2002091061).** The Southeast Urban Center Specific Plan EIR describes potential impacts of development of the project area consistent with the specific plan land use map. Some of these impacts (e.g. runoff, aesthetics, etc.) are to be expected with any urban development, and are therefore applicable to the current project.
- **Traffic and Circulation Study for the Southeast Urban Center Specific Plan EIR, City of Clovis, California, Associated Transportation Engineers, December, 2002.** This document analyzes traffic impacts associated with the development of the proposed Southeast Urban Center (Loma Vista) Specific Plan.
- **Findings and Statement of Overriding Considerations prepared for the adoption of the Loma Vista Specific Plan.** Adoption of the development plan contained in the Loma Vista Specific Plan is expected to result in certain unavoidable environmental impacts (Increased light and glare, loss of agricultural resources, air quality impacts, and increased noise) that the City has determined are outweighed by the potential benefits of the plan implementation. These impacts are applicable to the project at hand due to the fact that the proposal is consistent with the planned urbanization of the specific plan planning area.
- **Environmental Impact Report prepared for the Clovis Landfill Expansion and Permitting Project (Certified July 11, 2005, SCH No. 2002091105).** The EIR examined the potential impacts of a revision to the city's Solid Waste Facility Permit to expand filling operations and expand the land fill property boundaries.
- **Environmental Impact Report prepared for the Clovis Sewage Treatment /Water Reuse Facility Program (Certified July 18, 2005, SCH No. 2004061065).** The EIR examined the potential impacts from the construction and operation of the City's new sewage treatment/water reuse facility (ST/WRF) that would provide an alternative solution to its current sewage (wastewater) treatment services capabilities.
- **Clovis Municipal Code Title 5 (Public Welfare, Morals And Conduct) and Title 9 (Development Code).** This Code consists of all the regulatory, penal, and administrative laws of general application of the City of Clovis and specifically to development standards, property maintenance and nuisances, necessary for the protection of health and welfare, codified pursuant to the authority contained in Article 2 of Chapter 1 of Part 1 of Division 1 of Title 5 of the Government Code of the State of California.
- **California Health and Safety Code Section 7050.5.** This section states that in the event that human remains are discovered, there shall be no further disturbance of the site of any nearby area reasonably suspected to overlie adjacent remains until the coroner of the county in which the remains are discovered has been notified. If the remains are determined to be Native American, guidelines of the Native American Heritage Commission shall be adhered to in the treatment and disposition of the remains.
- **Section 15064.5 of the CEQA Guidelines.** This section addresses the discovery of human remains, and the disturbance of potential archaeological, cultural, and historical resources. The requirements of Section 15064.5 with regard to the discovery of human remains are identical to the requirements of Health and Safety Code Section 7050.5.

1.0 INTRODUCTION

- **City of Clovis 2014-2015 Budget.** The budget provides information about city services, and objectives, annual spending plan for the 2014-2015 fiscal year, debt obligations, and the five-year Community Investment Program.
- **City of Clovis Economic Development Strategy (Adopted September 13, 2004).** The City of Clovis Economic Development Strategy outlines the City's strategies for the retention, expansion, and attraction of industrial development, commercial development, and tourism.
- **City of Clovis 2010 Urban Water Management Plan.** The Clovis Urban Water Management Plan outlines the City's strategy to manage its water resources through both conservation and source development. The Plan was prepared in compliance with California Water Code Section 10620.
- **Fresno Metropolitan Flood Control District Storm Drainage and Flood Control Master Plan (Adopted January 2006).** The Fresno Metropolitan Flood Control District (FMFCD) is located in the north-central portion of Fresno County between the San Joaquin and Kings rivers. The FMFCD service area includes most of the Fresno-Clovis metropolitan area (excluding the community of Easton), and unincorporated lands to the east and northeast. The Storm Drainage and Flood Control Master Plan includes program planning, structure, service delivery, and financing, for both flood control and local drainage services. The flood control program relates to the control, containment, and safe disposal of storm waters that flow onto the valley floor from the eastern streams. The local drainage program relates to the collection and safe disposal of storm water runoff generated within the urban and rural watersheds.
- **Fresno Metropolitan Flood Control District Notice of Requirements, June, 24, 2015,** A letter from the District stating that their facilities can accommodate the Project.
- **Staff Report on Burrowing Owl Mitigation (CDFG 1995).** This report provides CEQA Lead Agencies and Project proponents the context in which the Department of Fish and Game will review Project specific mitigation measures. The report also includes pre-approved mitigation measures which have been judged to be consistent with policies, standards and legal mandates of the State Legislature, the Fish and Game Commission, and the Department's public trust responsibilities.
- **San Joaquin Valley Air Pollution Control District, Regulation VIII - Fugitive PM10 Prohibitions.** The purpose of Regulation VIII (Fugitive PM10 Prohibitions) is to reduce ambient concentrations of fine particulate matter (PM10) by requiring actions to prevent, reduce or mitigate anthropogenic fugitive dust emissions. Regulation VIII is available for download at <http://www.valleyair.org/rules/1ruleslist.htm#reg8>. A printed copy may be obtained at the District's Central Region offices at 1990 E. Gettysburg Ave., Fresno, CA 93726.
- **Options for Addressing Climate Change in San Luis Obispo County, San Luis County Air Pollution Control District, November 16, 2005.** This document describes the major sources of greenhouse gases, actions underway at community, national and international levels to combat the problem and recommendations for actions the San Luis Obispo County Air Pollution Control District can take locally to help address the issue.

- **Executive Summary, Climate Action Team Report to the Governor and California Legislature, California Environmental Protection Agency, March 2006.** This document provides a summary of the means to achieve the Governor's climate change emission reduction targets that will build on voluntary actions of California businesses, local government and community action, and State incentive and regulatory programs to achieve the targets.
- **Our Changing Climate, Assessing the Risks to California, A Summary Report From the California Climate Change Center, July 2006.** This document summarizes the recent findings of the California Climate Change Center's "Climate Scenarios" project, which analyzed a range of impacts that projected rising temperatures would likely have on California.
- **Climate Change 2007: The Physical Science Basis, Summary for Policy Makers, Intergovernmental Panel on Climate Change, February 2007.** This document describes progress in understanding of the human and natural drivers of climate change, observed climate change, climate processes and attribution, and estimates of projected future climate change.
- **Fresno Irrigation District Letter, May 12, 2015,** An evaluation of project impacts on Fresno Irrigation District facilities.
- **City of Clovis Wastewater Collection System Master Plan Modification Review, October 21, 2009,** An evaluation of impacts to the Master Sewer Collection System.
- **San Joaquin Valley Air Pollution Control District Letter, May 5, 2015,** An evaluation of project impact to air quality.
- **Biological Evaluation from Argonaut Ecological Consulting, Inc., April 2015,** An evaluation of biological impacts.
- **Air Quality and Global Climate Change Evaluation from Scientific Resources, April 8, 2015,** An evaluation of the impacts related to Air Quality and Green House Gas.
- **Clovis Engineering Division Sewer Assessment Memo, August 22, 2014,** An evaluation of impacts related to sewer resources.
- **Clovis Engineering Division Water Assessment Memo, August 22, 2014,** An evaluation of impacts related to water resources.
- **Clovis Unified School District, Letter dated August 18, 2014,** An evaluation of school enrollment.
- **Traffic Evaluation by KD Anderson & Associates, Dated September 26, 2014, and supplemental memo dated April 13, 2015,** evaluating a reduction in lots.

Unless otherwise noted, documents incorporated by reference in this Initial Study are available for review at the Clovis Planning and Development Services Department located at 1033 Fifth Street, Clovis, CA 93612 during regular business hours.

1.0 INTRODUCTION

1.5 PURPOSE AND DOCUMENT ORGANIZATION

The purpose of this Initial Study and draft Negative Declaration is to evaluate the potential environmental impacts of the proposed project.

This document is divided into the following sections:

- **1.0 Introduction** – Provides an introduction and describes the purpose and organization of this document;
- **2.0 Project Description** – Provides a detailed description of the proposed project;
- **3.0 Environmental Setting and Impacts Mitigation Measures** – Describes the environmental setting for each of the environmental subject areas, evaluates a range of impacts classified as "no impact," "less than significant," "less than significant with mitigation incorporated," or "potentially significant" in response to the environmental checklist, and provides mitigation measures, where appropriate, to mitigate potentially significant impacts to a less than significant level;
- **4.0 Cumulative Impacts** – Includes a discussion of cumulative impacts;
- **5.0 Determination** – Provides the environmental determination for the project;
- **6.0 Report Preparation and References** – Identifies staff and consultants responsible for preparation of this document; and a list of sources utilized.

2.0 PROJECT DESCRIPTION

2.1 PROJECT OVERVIEW AND NEED

The project consists of a request to annex and prezone approximately 79.92 acres and approve a vesting tentative tract map for a 112-lot single-family residential planned residential development located near the northeast of the Gould Canal and Leonard Avenues, in the City of Clovis Sphere of Influence, County of Fresno. The development of the site will necessitate the demolition of one home on the southeast corner of Dakota and Leonard Avenues. The Project also includes a request to reclassify Dakota Avenue between Leonard and Highland Avenues from a Collector street to a Local street. Finally the request includes detaching the entire 79.92 acres from the Fresno County Fire Protection District and the Kings River Conservation District.

The following provides a description of the proposed Project, anticipated design of the Project, and a description of the existing setting of the Project area. Section 3.0 of this document provides an analysis of the environmental effects associated with this Project.

2.2 PROJECT LOCATION

The proposed Project is located within the City of Clovis Sphere of Influence in the County of Fresno (see **Figure 2.0-1**). The proposed Project site is located near the northeast corner the Gould Canal and Leonard Avenues (see **Figure 2.0-2**). The Project is generally bounded by the Dog Creek on the west, the Gould Canal on the south, the Dakota Avenue alignment on the north, and Highland Avenue on the east.

The Project area includes eight properties, six which have single-family homes, one a Fresno Metropolitan Flood Control District Basin, one vacant property used for farming and the remaining 21.27 acres is used for agricultural farming. The Project site is designated by the General Plan as Agriculture and Public Facility and is currently zoned County AE-20.

Figure 2.0- 1 Regional Location

2.0 PROJECT DESCRIPTION

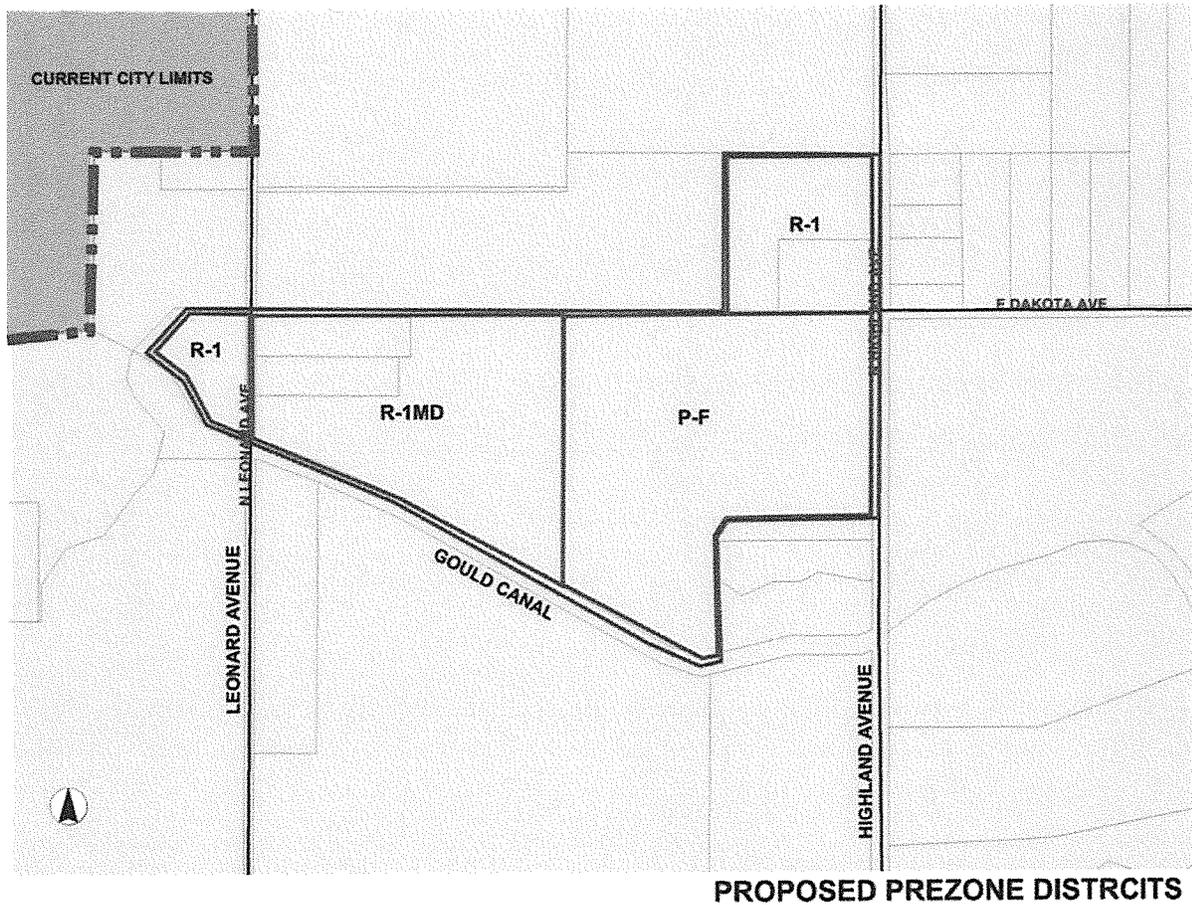

Figure 2.0- 2 Project Location

The Project will be completed in accordance with the California Building Code; City of Clovis Municipal Code; and 2014 City of Clovis Standards.

2.3 DESCRIPTION OF PROPOSED IMPROVEMENTS

The Project will include, demolition of existing wells and septic systems, prezoning, and tentative maps for site grading, installation of off-site improvements, and infrastructure to accommodate a 112-lot single-family residential development with landscaping, street and trail improvements. Potential development could include right-of-way acquisition along future streets and connection of City services to both County and annexed rural residential properties. The project also includes annexation from the County of Fresno to the City of Clovis, right-of-way acquisition, and detaching the entire 79.92 acres from the Fresno County Fire Protection District and the Kings River Conservation District.

2.4 PROPOSED DESIGN OF THE SITE

Figure 2.0-3 shows proposed vesting tentative map for the area associated with the tentative tract map.

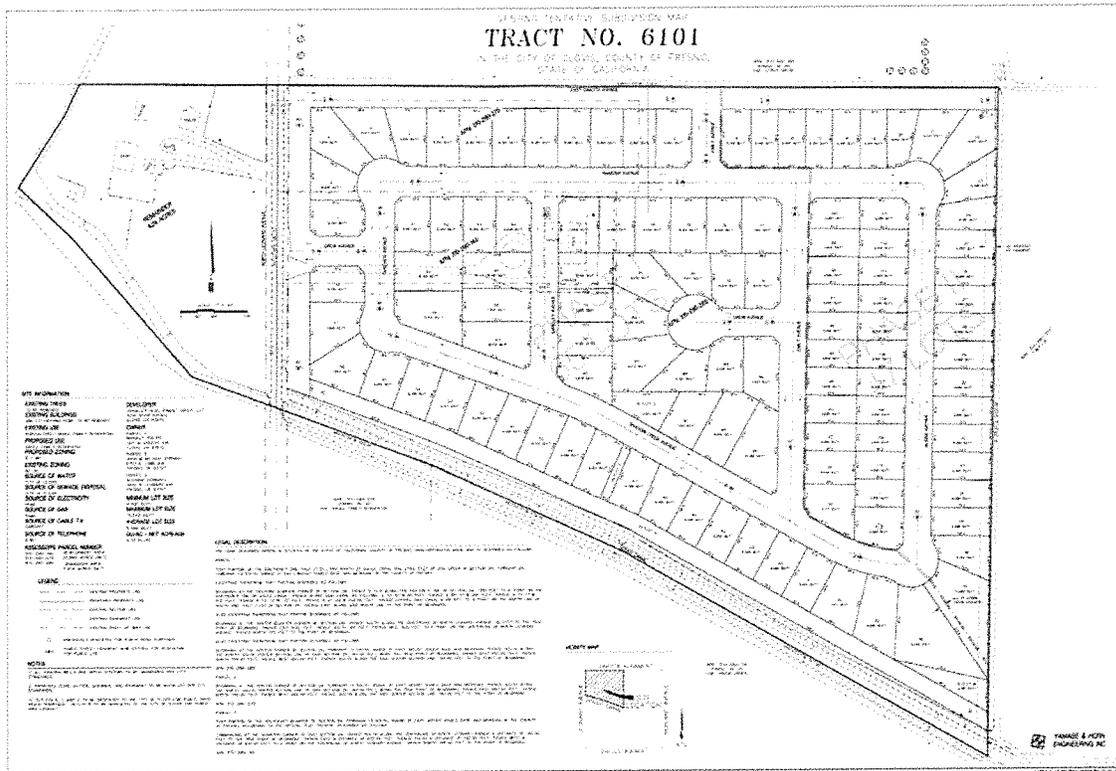

Figure 2.0- 3 Project Site Plan

2.5 ENVIRONMENTAL MEASURES

Environmental measures are methods, measures, standard regulations, or practices that avoid, reduce, or minimize a project's adverse effects on various environmental resources. Based on the underlying authority, they may be applied before, during, or after construction of the Project.

The following standard environmental measures, which are drawn from City ordinances and other applicable regulations and agency practices, would be implemented as part of the Project and incorporated into the City's approval processes for specific individual projects in the future. The City would ensure that these measures are included in any Project construction specifications (for example, as conditions of approval of a tentative parcel or subdivision map), as appropriate. This has proven to be effective in reducing potential impacts by establishing polices, standard requirements that are applied ministerially to all applicable projects.

Environmental Measure 1: Measures to Minimize Effects of Construction-Related Noise

The following construction noise control standards per the Clovis Municipal Code (Clovis Municipal Code Section 9.3.228.10 et seq.) will be required, which are proven effective in reducing and controlling noise generated from construction-related activities.

- Noise-generating construction activities, Unless otherwise expressly provided by permit, construction activities are only permitted between the hours of 7:00 a.m. and 7:00 p.m.

2.0 PROJECT DESCRIPTION

Monday through Friday and between 9:00 a.m. and 5:00 p.m. on Saturday and Sunday. From June 1st through September 15th, permitted construction activity may commence after 6:00 a.m. Monday through Friday. Extended construction work hours must at all times be in strict compliance with the permit.

- Stationary equipment (e.g., generators) will not be located adjacent to any existing residences unless enclosed in a noise attenuating structure, subject to the approval of the Director.

Environmental Measure 2: Erosion Control Measures to Protect Water Quality

To minimize the mobilization of sediment to adjacent water bodies, the following erosion and sediment control measures will be included in the storm water pollution prevention plan (SWPPP), to be included in the construction specifications and Project performance specifications, based on standard City measures and standard dust-reduction measures for each development.

- Cover or apply nontoxic soil stabilizers to inactive construction areas (previously graded areas inactive for 10 days or more) that could contribute sediment to waterways.
- Enclose and cover exposed stockpiles of dirt or other loose, granular construction materials that could contribute sediment to waterways.
- Contain soil and filter runoff from disturbed areas by berms, vegetated filters, silt fencing, straw wattle, plastic sheeting, catch basins, or other means necessary to prevent the escape of sediment from the disturbed area.
- No earth or organic material shall be deposited or placed where it may be directly carried into a stream, marsh, slough, lagoon, or body of standing water.
- Prohibit the following types of materials from being rinsed or washed into the streets, shoulder areas, or gutters: concrete; solvents and adhesives; thinners; paints; fuels; sawdust; dirt; gasoline; asphalt and concrete saw slurry; heavily chlorinated water.
- Dewatering activities shall be conducted according to the provisions of the SWPPP. No dewatered materials shall be placed in local water bodies or in storm drains leading to such bodies without implementation of proper construction water quality control measures.

Environmental Measure 3: Dust Control Measures to Protect Air Quality

- To control dust emissions generated during construction of future parcels, the following San Joaquin Valley Unified Air Pollution Control District (SJVAPCD) Regulation VIII Control Measures for construction emissions of PM10 are required to be implemented (SJVUAPCD Rule 8021). They include the following:
- Watering—for the purpose of dust control, carry-out, and tracking control—shall be conducted during construction in accordance with the City of Clovis's Storm Water Management Plan (SWMP) and the Project Storm Water Pollution Prevention Plan (SWPPP), if applicable.

2.0 PROJECT DESCRIPTION

- All disturbed areas, including storage piles, which are not being actively utilized for construction purposes, shall be effectively stabilized of dust emissions using water, chemical stabilizer/suppressant, covered with a tarp or other suitable cover or vegetative ground cover.
- All onsite unpaved roads and offsite unpaved access roads shall be effectively stabilized of dust emissions using water or chemical stabilizer/suppressant.
- All land clearing, grubbing, scraping, excavation, land leveling, grading, cut and fill, and demolition activities shall be effectively controlled of fugitive dust emissions utilizing application of water or by presoaking.
- With the demolition of buildings up to six stories in height, all exterior surfaces of the building shall be wetted during demolition.
- When materials are transported off site, all material shall be covered, or effectively wetted to limit visible dust emissions, and at least 2 feet of freeboard space from the top of the container shall be maintained.
- All operations shall limit or expeditiously remove the accumulation of mud or dirt from adjacent public streets at the end of each workday. (The use of dry rotary brushes is expressly prohibited except where preceded or accompanied by sufficient wetting to limit the visible dust emissions.) (Use of blower devices is expressly forbidden.)
- Following the addition of materials to, or the removal of materials from, the surface of outdoor storage piles, said piles shall be effectively stabilized of fugitive dust emissions utilizing sufficient water or chemical stabilizer/suppressant.

Environmental Measure 4: Measures to Control Construction-Related Emissions

To comply with guidance from the SJVAPCD, the City will incorporate the following measures into the construction specifications and Project performance specifications.

- The construction contractor will ensure that all diesel engines are shut off when not in use on the premises to reduce emissions from idling.
- The construction contractor will review and comply with SJVAPCD Rules 8011 to 8081 (Fugitive Dust), 4102 (Nuisance), 4601 (Architectural Coatings), and 4641 (Paving and Maintenance Activities). Current SJVAPCD rules can be found at <http://www.valleyair.org/rules/1ruleslist.htm>.
- The construction contractor will use off-road trucks that are equipped with on-road engines, when possible.
- The construction contractor will use light duty cars and trucks that use alternative fuel or are hybrids, if feasible.

2.0 PROJECT DESCRIPTION

Environmental Measure 5: Measures to Minimize Exposure of People and the Environment to Potentially Hazardous Materials

Construction of the Project could create a significant hazard to workers, the public, or the environment through the transport, use or disposal of hazardous materials. Small quantities of potentially toxic substances (such as diesel fuel and hydraulic fluids) would be used and disposed of at the site and transported to and from the site during construction. Accidental releases of small quantities of these substances could contaminate soils and degrade the quality of surface water and groundwater, resulting in a public safety hazard.

To minimize the exposure of people and the environment to potentially hazardous materials, the following measures will be included in the construction specifications and Project performance specifications for each parcel that includes the use of hazardous materials, based on the City's standard requirements that construction specifications include descriptions of the SWPPP, dust control measures, and traffic mobilization.

- *Develop and Implement Plans to Reduce Exposure of People and the Environment to Hazardous Conditions Caused by Construction Equipment.* The City/contractor shall demonstrate compliance with Cal OSHA as well as federal standards for the storage and handling of fuels, flammable materials, and common construction-related hazardous materials and for fire prevention. Cal OSHA requirements can be found in the California Labor Code, Division 5, and Chapter 2.5. Federal standards can be found in Occupational Safety and Health Administration Regulations, Standards—29 CFR. These standards are considered to be adequately protective such that significant impacts would not occur. Successful development and implementation of the proper storage and handling of hazardous materials will be measured against the state and federal requirements as verified by the City of Clovis.
- *Develop and Implement a Hazardous Materials Business Plan in Accordance with the Requirements of the County of Fresno Environmental Health System Hazardous Materials Business Plan Program.* The City shall require contractors to develop and implement a Hazardous Materials Business Plan, if required, in accordance with the requirements of the County of Fresno Environmental Health System (EHS) Hazardous Materials Business Plan Program. The Hazardous Materials Business Plan shall be submitted to the County EHS and the City of Clovis Fire Department prior to construction activities and shall address public health and safety issues by providing safety measures, including release prevention measures; employee training, notification, and evacuation procedures; and adequate emergency response protocols and cleanup procedures. A copy of the Hazardous Materials Business Plan shall be maintained on-site, during site construction activities and as determined by the County EHS.
- *Immediately Contain Spills, Excavate Spill-Contaminated Soil, and Dispose at an Approved Facility.* In the event of a spill of hazardous materials in an amount reportable to the Clovis Fire Department (as established by fire department guidelines), the contractor shall immediately control the source of the leak, contain the spill and contact the Clovis Fire Department through the 9-1-1 emergency response number. If required by the fire department or other regulatory agencies, contaminated soils shall be excavated, treated and/or disposed of off-site at a facility approved to accept such soils.

As applicable, each Project applicant shall demonstrate compliance with Cal-OSHA for the storage and handling of fuels, flammable materials, and common construction-related hazardous materials and for fire prevention. Cal-OSHA requirements can be found in the California Labor Code, Division 5, Chapter 2.5. Federal standards can be found in Occupational Safety and Health Administration Regulations, Standards—29 CFR.

Environmental Measure 6: Measures to Protect Undiscovered Cultural Resources

If buried cultural resources, such as chipped or ground stone, historic debris, building foundations, or human bone, are inadvertently discovered during ground-disturbing activities, the City shall require that work stop in that area and within 100 feet of the find until a qualified archaeologist can assess the significance of the find and, if necessary, develop appropriate treatment measures in consultation with the City of Clovis and other appropriate agencies.

If human remains of Native American origin are discovered during Project construction, it is necessary to comply with state laws relating to the disposition of Native American burials, which fall within the jurisdiction of the Native American Heritage Commission (Pub. Res. Code Sec. 5097). If any human remains are discovered or recognized in any location other than a dedicated cemetery, there will be no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent human remains until:

- The Fresno County coroner has been informed and has determined that no investigation of the cause of death is required; and if the remains are of Native American origin,
 - The descendants of the deceased Native Americans have made a recommendation to the landowner or the person responsible for the excavation work, for means of treating or disposing of, with appropriate dignity, the human remains and any associated grave goods as provided in Public Resources Code Section 5097.98, or
 - The Native American Heritage Commission was unable to identify a descendant or the descendant failed to make a recommendation within 24 hours after being notified by the commission.

According to California Health and Safety Code, six or more human burials at one location constitute a cemetery (Section 8100) and disturbance of Native American cemeteries is a felony (Section 7052). Section 7050.5 requires that construction or excavation be stopped in the vicinity of discovered human remains until the coroner can determine whether the remains are those of a Native American. If the remains are determined to be Native American, the coroner must contact the California Native American Heritage Commission.

Environmental Measure 7: Develop and Implement a Construction Traffic Control Plan

If applicable, the construction contractor, in coordination with the City, will prepare a traffic control plan during the final stage of Project design. The purpose of the plan is to insure public safety, provide noise control and dust control. The plan shall be approved by the City of Clovis City Engineer and comply with City of Clovis's local ordinances and standard policies.

2.0 PROJECT DESCRIPTION

The construction traffic control plan will be provided to the City of Clovis for review and approval prior to the start of construction and implemented by construction contractor during all construction phases, and monitored by the City.

2.6 REQUIRED PROJECT APPROVALS

In addition to the approval of the proposed Project by the City of Clovis, the following agency approvals may be required:

- San Joaquin Unified Air Pollution Control District
- Fresno Metropolitan Flood Control District
- Fresno Local Area Formation Commission

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

INTRODUCTION

This chapter provides an evaluation of the potential environmental impacts of the proposed Project, including the CEQA Mandatory Findings of Significance. There are 17 specific environmental topics evaluated in this chapter. Other CEQA considerations are evaluated in Chapter 4.0. The environmental topics evaluated in this chapter include:

- Aesthetics
- Agriculture and Forest Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Geology/Soils
- Greenhouse Gas Emissions
- Hazards & Hazardous Materials
- Hydrology/Water Quality
- Land Use/Planning
- Mineral Resources
- Noise
- Population/Housing
- Public Services
- Recreation
- Transportation/Traffic
- Utilities/Service Systems

For each issue area, one of four conclusions is made:

- **No Impact:** No project-related impact to the environment would occur with project development.
- **Less Than Significant Impact:** The proposed project would not result in a substantial and adverse change in the environment. This impact level does not require mitigation measures.
- **Less Than Significant with Mitigation Incorporated:** The proposed project would result in an environmental impact or effect that is potentially significant, but the incorporation of mitigation measure(s) would reduce the project-related impact to a less than significant level.
- **Potentially Significant Impact:** The proposed project would result in an environmental impact or effect that is potentially significant, and no mitigation can be identified that would reduce the impact to a less than significant level.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.1 AESTHETICS				
<i>Would the Project:</i>				
a. Have a substantial effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Substantially degrade the existing visual character or quality of the site and its surroundings?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Create a new source of substantial light or glare that would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

ENVIRONMENTAL SETTING

The City of Clovis is located within the San Joaquin Valley. As a result, the Project site and surrounding areas are predominantly flat. The flat topography of the valley floor provides a horizontal panorama providing vistas of the valley. On clear days, the Sierra Nevada Mountains are visible to the east. Aside from the Sierra Nevada and nearby foothills, there are no outstanding focal points or views from the City.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

The Project may result in significant aesthetic impacts if it substantially affects the view of a scenic corridor, vista, or view open to the public, causes substantial degradation of views from adjacent residences, or results in night lighting that shines into adjacent residences.

Checklist Discussion

a) Less Than Significant Impact. The proposed Project will not obstruct federal, state or locally classified scenic areas, historic properties, community landmarks, or formally classified scenic resources such as a scenic highway, national scenic area, or state scenic area. The City of Clovis is located in a predominantly agricultural area at the base of the Sierra Nevada Mountain Range, which provides for aesthetically pleasing views and open spaces. The project site is currently used for agricultural purposes and has no existing structures. The Project proposes R-1MD zoning which permits two-story development, consistent with that allowed in adjacent development zoning. The project proposes one and two-story development consistent with the Clovis Development Code. As such, the implementation of the Project using current zoning standards, would result in a less than significant impact to the scenic vista.

b) Less Than Significant Impact. The Project is located in a predominately urban area. The development of this parcel with single-story and two-story development would have a less than significant impact on scenic resources.

c) Less Than Significant Impact. The project site is currently vacant and has some existing single family homes and agricultural structures. The implementation of the Project, consistent with the existing and proposed zoning would not substantially degrade the visual character or quality of the site and its surroundings.

d) Less Than Significant Impact with Mitigation. The Project will include on-site project and off-site street lighting, which would introduce a new source of light. The lighting is necessary to provide enough illumination at night for security purposes. All lighting will be installed per City standards which require specific fixtures to reduce up-lighting or lighting having direct impact to adjacent development. With the inclusion of the following Mitigation Measure, impacts in this category will be reduced to a less than significant impact.

Mitigation measure 3.1-d

The developer shall direct all lighting downward and provide physical shields to prevent direct view of the light source from adjacent residential properties.

CONCLUSIONS RELATING TO AESTHETICS

All work is consistent with the plans and policies of the City of Clovis, including the General Plan, and would not be out of character with the urban environment or what is currently located in the area. Therefore, the Project will have a less than significant impact on any aesthetic resources.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.2 AGRICULTURE AND FOREST RESOURCES				
<i>Would the Project:</i>				
a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220 (g)) or timberland (as defined in Public Resources Code section 4526)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

ENVIRONMENTAL SETTING

Fresno County

Since the early 1950s, Fresno County has led all counties in the United States in the greatest agricultural production by dollar value (Fresno County 2000; Fresno County 2011). Agriculture is the largest industry in the county, producing \$5.94 billion in 2010. The top five crops by dollar value in 2010, in descending order, were grapes, almonds, tomatoes, poultry, and milk (Fresno

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

County 2011). In 2010, about 1.6 million acres, or 2,500 square miles, were in agricultural production, that is, about 42 percent of the county's land area (UCCE 2011).

Clovis and Vicinity

The early agricultural history of Clovis was partly tied to the logging industry in the Sierra Nevada. A 42-mile log flume was built from Shaver Lake to Clovis, and a mill and finishing plant were developed in Clovis. Other agricultural products from the Clovis area included grains and livestock (Clovis 2012). Currently, there is little active agricultural use in the Plan Area because of water supply constraints and soil suitability issues, even though 7 percent of the SOI and 36 percent of the non-SOI Plan Area are designated Agriculture.

General Plan Designation for Agricultural Use

There are 10,199 acres in the Plan Area designated for agricultural use under the current General Plan— 9,810 acres in the non-SOI Plan Area and 389 acres in the SOI. No land within the City is designated for agriculture (see Figure 3-4, *Current General Plan Land Use*). The land designated for agriculture is approximately 23 percent of the entire Plan Area.

The General Plan EIR analyzed the impacts of the City's urban growth on agricultural land and includes mitigation measures to reduce those impacts; however, impacts to agricultural land remain significant and unavoidable. A Statement of Overriding Considerations was adopted for the impacts to agriculture lands. The proposed Project does not significantly impact agricultural resources as identified in the General Plan's PEIR.

IMPACTS

Significance Criteria

Checklist Discussion

a) Less than Significant Impact. A portion of the project is identified as Prime Farmland , Unique Farmland, or Farmland of Statewide Importance on the Department of Conservation's Farmland Map. The area of Prime Farmland , Unique Farmland, or Farmland of Statewide Importance, is less than 20 acres and is located within the Loma Vista Specific Plan Growth Area. The Clovis General Plan identified loss of prime farm land in its Program EIR and considered the impacts substantial and unavoidable. Mitigation measures were incorporated for areas outside of Loma Vista. Therefore, impacts in this category for this specific project are less than significant.

b) Less than Significant Impact. The Project site is currently designated Agriculture in the General Plan and is currently under a Williamson Act contract. The property owner has filed for non-renewal. Conversion of this property requires a General Plan Amendment where analysis of the viability of farm land at this location was addressed. This property is planned to be an island in the middle of urbanized residential development. Future farming operations at this site is considered less than viable.

c) No Impact. The Project will not conflict with any forest or timberland zoning. The Project site does not contain and is not adjacent to any forest or timberland resources.

d) No Impact. The Project will not result in the loss of forest land or conversion of forest land to non-forest use.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

e) Less than Significant Impact. All existing and/or planned services and infrastructure in the area can accommodate the proposed project. Other than the project site, there will be no changes to the existing environment which will result in conversion of Farmland to a non-agricultural use. The Project will not result in the other surrounding properties converting from farmland or forest land.

CONCLUSIONS RELATING TO AGRICULTURE AND FOREST RESOURCES

The Project will not convert prime agricultural land to a non-agricultural use and will not have any other effect on agricultural land or Forest Resources.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.3 AIR QUALITY				
<i>Will the proposal:</i>				
a. Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Violate any air quality standards or contribute to an existing or projected air quality violation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Create objectionable odors?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

ENVIRONMENTAL SETTING

SAN JOAQUIN VALLEY AIR BASIN

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

The City of Clovis (City) is in the central portion of the San Joaquin Valley Air Basin (SJVAB). SJVAB consists of eight counties: Fresno, Kern (western and central), Kings, Tulare, Madera, Merced, San Joaquin, and Stanislaus. Air pollution from significant activities in the SJVAB includes a variety of industrial-based sources as well as on- and off-road mobile sources. These sources, coupled with geographical and meteorological conditions unique to the area, stimulate the formation of unhealthy air.

The SJVAB is approximately 250 miles long and an average of 35 miles wide. It is bordered by the Sierra Nevada in the east, the Coast Ranges in the west, and the Tehachapi mountains in the south. There is a slight downward elevation gradient from Bakersfield in the southeast end (elevation 408 feet) to sea level at the northwest end where the valley opens to the San Francisco Bay at the Carquinez Straits. At its northern end is the Sacramento Valley, which comprises the northern half of California's Central Valley. The bowl-shaped topography inhibits movement of pollutants out of the valley (SJVAPCD 2012a).

Climate

The SJVAB is in a Mediterranean climate zone and is influenced by a subtropical high-pressure cell most of the year. Mediterranean climates are characterized by sparse rainfall, which occurs mainly in winter. Summers are hot and dry. Summertime maximum temperatures often exceed 100°F in the valley.

The subtropical high-pressure cell is strongest during spring, summer, and fall and produces subsiding air, which can result in temperature inversions in the valley. A temperature inversion can act like a lid, inhibiting vertical mixing of the air mass at the surface. Any emissions of pollutants can be trapped below the inversion. Most of the surrounding mountains are above the normal height of summer inversions (1,500–3,000 feet).

Winter-time high pressure events can often last many weeks, with surface temperatures often lowering into the 30°F. During these events, fog can be present and inversions are extremely strong. These wintertime inversions can inhibit vertical mixing of pollutants to a few hundred feet (SJVAPCD 2012a).

Ambient Air Quality Standards

The Clean Air Act (CAA) was passed in 1963 by the US Congress and has been amended several times. The 1970 Clean Air Act amendments strengthened previous legislation and laid the foundation for the regulatory scheme of the 1970s and 1980s. In 1977, Congress again added several provisions, including nonattainment requirements for areas not meeting National AAQS and the Prevention of Significant Deterioration program. The 1990 amendments represent the latest in a series of federal efforts to regulate the protection of air quality in the United States. The CAA allows states to adopt more stringent standards or to include other pollution species. The California Clean Air Act (CCAA), signed into law in 1988, requires all areas of the state to achieve and maintain the California AAQS by the earliest practical date. The California AAQS tend to be more restrictive than the National AAQS, based on even greater health and welfare concerns.

These National and California AAQS are the levels of air quality considered to provide a margin of safety in the protection of the public health and welfare. They are designed to protect "sensitive receptors," those most susceptible to further respiratory distress, such as asthmatics, the

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

elderly, very young children, people already weakened by other disease or illness, and persons engaged in strenuous work or exercise. Healthy adults can tolerate occasional exposure to air pollutant concentrations considerably above these minimum standards before adverse effects are observed.

Both California and the federal government have established health-based AAQS for seven air pollutants. As shown in Table 5.3-1, *Ambient Air Quality Standards for Criteria Pollutants*, these pollutants are ozone (O₃), nitrogen dioxide (NO₂), carbon monoxide (CO), sulfur dioxide (SO₂), coarse inhalable particulate matter (PM₁₀), fine inhalable particulate matter (PM_{2.5}), and lead (Pb). In addition, the state has set standards for sulfates, hydrogen sulfide, vinyl chloride, and visibility-reducing particles. These standards are designed to protect the health and welfare of the populace with a reasonable margin of safety.

**TABLE 3.4-1
FEDERAL AND STATE AMBIENT AIR QUALITY STANDARDS**

<i>Pollutant</i>	Averaging Time	Federal Primary Standard	State Standard
Ozone	1-Hour	–	0.09 ppm
	8-Hour	0.075 ppm	0.07 ppm
Carbon Monoxide	8-Hour	9.0 ppm	9.0 ppm
	1-Hour	35.0 ppm	20.0 ppm
Nitrogen Dioxide	Annual	0.053 ppm	0.03 ppm
	1-Hour	0.100 ppm	0.18 ppm
Sulfur Dioxide	Annual	0.03 ppm	–
	24-Hour	0.14 ppm	0.04 ppm
	1-Hour	0.075 ppm	0.25 ppm
PM ₁₀	Annual	–	20 ug/m ³
	24-Hour	150 ug/m ³	50 ug/m ³
PM _{2.5}	Annual	15 ug/m ³	12 ug/m ³
	24-Hour	35 ug/m ³	–
Lead	30-Day Avg.	–	1.5 ug/m ³
	3-Month Avg.	1.5 ug/m ³	–

Notes: ppm = parts per million; ug/m³ = micrograms per cubic meter.

Source: California Air Resources Board, 2008. Ambient Air Quality Standards (4/01/08), <http://www.arb.ca.gov.oqs/aaqs2.pdf>.

In addition to the criteria pollutants discussed above, toxic air contaminants (TACs) are another group of pollutants of concern. TACs are injurious in small quantities and are regulated despite the absence of criteria documents. The identification, regulation and monitoring of TACs is relatively recent compared to that for criteria pollutants. Unlike criteria pollutants, TACs are regulated on the basis of risk rather than specification of safe levels of contamination.

Attainment Status

The air quality management plans prepared by SJVAPCD provide the framework for SJVAB to achieve attainment of the state and federal AAQS through the SIP. Areas are classified as attainment or nonattainment areas for particular pollutants, depending on whether they meet

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

the ambient air quality standards. Severity classifications for ozone nonattainment range in magnitude from marginal, moderate, and serious to severe and extreme.

At the federal level, the SJVAPCD is designated as extreme nonattainment for the 8-hour ozone standard, attainment for PM10 and CO, and nonattainment for PM2.5. At the state level, the SJVAB is designated nonattainment for the 8-hour ozone, PM10, and PM2.5 standards. The SJVAB has not attained the federal 1-hour ozone, although this standard was revoked in 2005.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

The SJVUAPCD has established the following standards of significance (SJVUAPCD, 1998). A project is considered to have significant impacts on air quality if:

- 1) A project results in new direct or indirect emissions of ozone precursors (ROG or NOx) in excess of 10 tons per year.
- 2) Any project with the potential to frequently expose members of the public to objectionable odors will be deemed to have a significant impact.
- 3) Any project with the potential to expose sensitive receptors (including residential areas) or the general public to substantial levels of toxic air contaminants would be deemed to have a potentially significant impact.
- 4) A project produces a PM10 emission of 15 tons per year (82 pounds per day).

While the SJVUAPCD CEQA guidance recognizes that PM₁₀ is a major air quality issue in the basin, it has to date not established numerical thresholds for significance for PM₁₀. However, for the purposes of this analysis, a PM₁₀ emission of 15 tons per year (82 pounds per day) was used as a significance threshold. This emission is the SJVUAPCD threshold level at which new stationary sources requiring permits for the SJVUAPCD must provide emissions "offsets". This threshold of significance for PM₁₀ is consistent with the SJVUAPCD's ROG and NO_x thresholds of ten tons per year which are also the offset thresholds established in SJVUAPCD Rule 2201 New and Modified Stationary Source Review Rule.

The SJVUAPCD significance threshold for construction dust impacts is based on the appropriateness of construction dust controls, including compliance with its Regulation VIII fugitive PM10 Prohibitions. The SJVUAPCD guidelines provide feasible control measures for construction emission of PM₁₀ beyond that required by SJVUAPCD regulations. If the appropriate construction controls are to be implemented, then air pollutant emissions for construction activities would be considered less than significant.

The projects impacts to air quality was analyzed by First Carbon Solutions, dated August 13, 2014. The study concluded that the Project related impacts are less than significant.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

Checklist Discussion

a) Less Than Significant Impact. The Project site is located within the San Joaquin Valley Air Basin (SJVUAPCD), which is a "nonattainment" area for the federal and state ambient air quality standards for ozone and PM₁₀. The Federal Clean Air Act and the California Clean Air Act require areas designated as nonattainment to reduce emissions until standards are met. The proposed Project would not obstruct implementation of an air quality plan; however, temporary air quality impacts could result from construction activities. The proposed Project would not create a significant impact over the current levels of ozone and PM₁₀ or result in a violation of any applicable air quality standard. The Project is not expected to conflict with the SJVUAPCD's attainment plans. The Project will be subject to the SJVUAPCD's Regulation VIII to reduce PM₁₀ emissions and subject to Environmental Measure 3: Dust Control Measures to Protect Air Quality. With the incorporation of these existing measures, the Project will have a less than significant impact.

b) Less Than Significant Impact. The proposed Project would result in short-term construction related emissions (dust, exhaust, etc.). The SJVAB currently exceeds existing air quality standards for ozone and the State Standard for PM₁₀. However, as with all construction projects, the Project will be subject to the rules and regulations adopted by the SJVUAPCD to reduce emissions throughout the San Joaquin Valley and will be subject to Environmental Measure 4: Measures to Control Construction-Related Emissions. Therefore, the Project would create a less than significant impact with existing measures incorporated.

c) Less Than Significant Impact. See responses to 3.4a and b above.

d) Less Than Significant Impact. The existing sensitive receptors near the proposed Project include residences. The proposed Project may subject sensitive receptors to pollutant concentrations due to construction activities. The use of construction equipment would be temporary and all equipment is subject to permitting requirements of the SJVUAPCD. This impact is considered less than significant.

e) Less Than Significant Impact. Objectionable odors are possible during site preparation and construction. However, the odors are not expected to be persistent or have an adverse effect on residents or other sensitive receptors in the Project's vicinity. No objectionable odors are anticipated after construction activities are complete; therefore, the Project is expected to have a less than significant impact.

CONCLUSION REGARDING AIR QUALITY

The Project would not create any significant air quality impacts with the incorporation of the identified existing measures.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.4 BIOLOGICAL RESOURCES				
<i>Will the proposal result in impacts to:</i>				
a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

ENVIRONMENTAL SETTING

The Project site is currently vacant. The site is bounded by residential to the north, east and south and commercial and residential to the west.

IMPACTS AND MITIGATION MEASURES

Standards of Significance

The Project would have a significant effect on the biological resources if it would:

- 1) Interfere substantially with the movement of any resident or migratory fish or wildlife species;
- 2) Substantially diminish habitat for fish, wildlife or plants; or
- 3) Substantially affect a rare, threatened, or endangered species of animal or plant or the habitat of the species.

CEQA Guidelines Section 15380 further provides that a plant or animal species may be treated as "rare or endangered" even if not on one of the official lists if, for example, it is likely to become endangered in the foreseeable future. This includes listed species, rare species (both Federal and California), and species that could reasonably be construed as rare.

Checklist Discussion

- a) **Less than Significant Impact with Mitigation.** According to an assessment of the site performed by Argonout Ecological Consulting, Inc, the proposed project has the potential to cause a significant impact, either directly or through habitat modifications, on species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service. Impacts in this category may be mitigated to a less than significant level with the mitigation measures as listed below.
- b) **Less than Significant Impact.** There is no riparian habitat or other sensitive natural community identified in local or regional plans, policies, and regulations or by the California Department of Fish and Game or US Fish and Wildlife Service within the project area. Therefore, the proposed project would not have a substantial adverse effect on riparian or other sensitive natural habitat.
- c) **Less than Significant Impact.** The project would not have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act, including, but not limited to, marsh, vernal pool, coastal, etc., through direct removal, filling, hydrological interruption, or other means.
- d) **Less than Significant Impact.** The project would not interfere with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

- e) **Less than Significant Impact.** The project would not conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.
- f) **Less than Significant Impact.** The project would not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional or state habitat conservation plan.

Mitigation Measures

Mitigation Measure 3.4-a:

1. To prevent impacts to Migratory Bird Treaty Act-protected birds and their nests, removal of trees will be limited to only those necessary to construct the proposed project.
2. For trees that must be removed to construct the proposed project, the applicant will target the removal of trees to occur outside the nesting season between September 1st and February 28th. If trees cannot be removed outside the nesting season, pre-construction surveys will be conducted prior to tree removal to verify the absence of active raptor nests within 76 meters (250 feet) of construction activities.
3. If construction or tree removal is proposed during the breeding/nesting season for local avian species (typically March 1st through August 31st), a focused survey for active nests of raptors and migratory birds within and in the vicinity of (no less than 76 meters [250 feet] outside the project boundaries, where possible) the project site shall be conducted by a qualified biologist. Two surveys will be conducted, at least 1 week apart, with the second survey occurring no more than 2 days prior to tree removal. If no active nests are found, tree removal or construction activities may proceed.
4. If an active nest is located during pre-construction surveys, United States Fish and Wildlife Service and/or California Department of Fish and Wildlife (as appropriate) shall be notified regarding the status of the nest. Furthermore, construction activities shall be restricted as necessary to avoid disturbance of the nest until it is abandoned or the biologist deems disturbance potential to be minimal. Restrictions may include establishment of exclusion zones (no ingress of personnel or equipment at a minimum radius of 30 meters (100 feet) around an active raptor nest and a 15-meter (50-foot) radius around an active migratory bird nest) or alteration of the construction schedule.

No action is necessary if no active nests are found or if construction will occur during the non-breeding season (generally September 1st through February 28th).

CONCLUSIONS RELATING TO BIOLOGICAL RESOURCES

Implementation of Mitigation Measure (MM) BIO-3.4.a would assure that potential impacts to nesting birds and nesting habitat would be reduced to *levels of less than significant*.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.5 CULTURAL RESOURCES				
<i>Will the proposal:</i>				
a. Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Disturb any human remains, including those interred outside of formal cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

ENVIRONMENTAL SETTING

Mitigation Measures in the Clovis General Plan Program Environmental Impact Report, requires evaluation of the site for archaeological, paleontological, and historical structure sensitivity. These mitigation measures, which identify archaeological and paleontological levels of sensitivity, list historically important sites identified by the Fresno County Library. The Project is not anticipated to impact any cultural resources; however, the Project could lead to the disturbance of undiscovered archaeological and paleontological resources. General Plan Conservation Element Goal 2, acts to preserve historical resources, and mitigation measures adopted in association with the General Plan PEIR help to reduce potential impacts to a less than significant level. The project was evaluated by First Carbon Solutions who concluded that there are no previously recorded prehistoric or historic sites identified within a .5 mile radius of the project.

Pursuant to requirements of AB18, a notification was sent to the Native American Heritage Commission for review with local tribes for cultural significance. Staff did not receive any request for consultation within the 90-day review period.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

IMPACTS AND MITIGATION MEASURES

Significance Criteria

The Project may have a significant impact on cultural resources if it causes substantial adverse changes in the significance of a historical or archaeological resource as set forth by the California Register of Historic Places and Section 106 of the National Historic Preservation Act; directly or indirectly destroys a unique paleontological resource or site or unique geologic feature; or disturbs any human remains, including those interred in formal cemeteries. A cultural study was performed by First Carbon Solutions and concluded that there are no previously recorded prehistoric or historic sites identified within a .5 mile radius of the project.

Checklist Discussion

a) No Impact. The proposed Project would not cause a substantial adverse change in the significance of a historical resource as defined in §15064.5 of the CEQA Guidelines. There are no known historical resources that will be impacted by the proposed Project.

b) c) Less Than Significant Impact. The proposed Project is not anticipated cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5 of the CEQA Guidelines or directly or indirectly destroy a unique paleontological resource or site or unique geological features. There are no known archaeological or paleontological resources located in the areas of construction. These areas have been previously disturbed with previous agriculture activity; however with ground disturbance there is chance that previously undiscovered archaeological and/or paleontological resources could be uncovered. The Project is subject to Environmental Measure 6: Measures to Protect Undiscovered Cultural Resources. Therefore, impacts will be less than significant.

d) Less Than Significant Impact. The site has not been identified as containing areas where human remains may be located. However, Public Resources Code PRC Section 5097.98, provides procedures in case of accidental finds. Should any human remains be discovered at any time, all work is to stop and the County Coroner must also be immediately notified pursuant to the State Health and Safety Code, Section 7050.5 and the State Public Resources Code, Section 5097.98. If the remains are determined to be Native American, guidelines of the Native American Heritage Commission shall be adhered to in the treatment and disposition of the remains.

CONCLUSIONS RELATING TO CULTURAL RESOURCES

The Project would not create any significant impacts to cultural resources.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.6 GEOLOGY AND SOILS				
<i>Will the Project:</i>				
a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i). Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
ii) Strong seismic ground shaking?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iii) Seismic-related ground failure, including liquefaction?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iv) Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Have soils incapable of adequately supporting the use of septic tanks or alternative waste disposal systems where sewers are not available for the disposal of wastewater?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

ENVIRONMENTAL SETTING

Natural Hazards

The General Plan EIR identified no geologic hazards or unstable soil conditions known to exist on the Project site. There are several known faults that exist close enough to the Project to cause potential damage to structures or individuals. The City of Clovis has adopted the California Building Code to govern all construction within the City, further reducing potential impacts in this category by ensuring that development is designed to withstand seismic or other geologic hazards.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

The Project may result in significant earth impacts if it causes substantial erosion or siltation; exposes people and structures to geologic hazards or risk from faults, landslides, unstable soil conditions, etc.; or substantially alters the natural topography or a unique geological or physical feature. Grading that disturbs large amounts of land or sensitive grading areas (e.g. slopes in excess of 20 percent, intermittent drainages) may cause substantial erosion or siltation.

Checklist Discussion

ai.) No Impact. No known faults with evidence of historic activity cut through the valley soils in the Project vicinity. The major active faults and fault zones occur at some distance to the east, west, and south of the Project site, the closest fault being approximately 62 miles to the southwest. Due to the geology of the Project area and its distance from active faults, the potential for loss of life, property damage, ground settlement, or liquefaction to occur in the Project vicinity is considered minimal.

a ii) No Impact. Ground shaking generally decreases with distance and increases with the depth of unconsolidated alluvial deposits. The most likely source of potential ground shaking is attributed to the San Andreas, Owens Valley, and the White Wolf faults. Based on this premise, and taking into account the distance to the causative faults, the potential for ground motion in the vicinity of the Project site is such that a minimal risk can be assigned.

a iii) No Impact. Liquefaction describes a phenomenon in which a saturated soil loses strength during an earthquake as a result of induced shearing strains. Lateral and vertical movement of the soil mass, combined with loss of bearing usually results. Loose sand, high groundwater conditions (where the water table is less than 30 feet below the surface), higher intensity earthquakes, and particularly long duration of ground shaking are the requisite conditions for liquefaction. Studies indicate that the soil types are not conducive to liquefaction (General Plan, Page 7-6 and General Plan EIR, Page 4-5).

a iv) No Impact. Landslides and mudflows are more likely in foothill and mountain areas where fractured and steep slopes are present (as in the Sierra Nevada Mountains). The Project is located on relatively flat topography, therefore the Project will not result in or expose people to potential impacts from landslides or mudflows.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

b) No Impact. Construction of urban uses would create changes in absorption rates, drainage patterns, and the rate and amount of surface runoff on the selected Project site. Standard construction practices that comply with City of Clovis ordinances and regulations, the California Building Code, and professional engineering designs approved by the Clovis Engineering Division will mitigate any potential impacts from development, if any.

c) No Impact. The Project site would not be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the Project, and potentially result in off-site landslide, lateral spreading, subsidence, liquefaction or collapse.

d) No Impact. The Project will not result in or expose people to potential impacts from expansive soils.

e) No Impact. The City of Clovis provides necessary sewer and water systems for development within the City. The Project will not utilize septic tanks or alternate waste disposal.

CONCLUSIONS RELATING TO GEOLOGY/SOILS

The proposed Project is expected to result in less than significant impacts to geophysical conditions.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.7 GREENHOUSE GAS EMISSIONS				
<i>Will the proposal:</i>				
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Conflict with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

ENVIRONMENTAL SETTING

Greenhouse Gas Emissions Background

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

Gases that trap heat in the atmosphere are referred to as greenhouse gases (GHGs) because they capture heat radiated from the sun as it is reflected back into the atmosphere, much like a greenhouse does. The accumulation of GHG's has been implicated as a driving force for global climate change. Definitions of climate change vary between and across regulatory authorities and the scientific community, but in general can be described as the changing of the earth's climate caused by natural fluctuations and anthropogenic activities which alter the composition of the global atmosphere.

Individual Projects contribute to the cumulative effects of climate change by emitting GHGs during construction and operational phases. The principal GHGs are carbon dioxide, methane, nitrous oxide, ozone, and water vapor. While the presence of the primary GHGs in the atmosphere are naturally occurring, carbon dioxide (CO₂), methane (CH₄), and nitrous oxide (N₂O) are largely emitted from human activities, accelerating the rate at which these compounds occur within earth's atmosphere. Carbon dioxide is the "reference gas" for climate change, meaning that emissions of GHGs are typically reported in "carbon dioxide-equivalent" measures. Emissions of carbon dioxide are largely by-products of fossil fuel combustion, whereas methane results from off-gassing associated with agricultural practices and landfills. Other GHGs, with much greater heat-absorption potential than carbon dioxide, include hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride, and are generated in certain industrial processes.

There is international scientific consensus that human-caused increases in GHGs have and will continue to contribute to global warming, although there is uncertainty concerning the magnitude and rate of the warming. Potential global warming impacts in California may include, but are not limited to, loss in snow pack, sea level rise, more extreme heat days per year, more high ozone days, more large forest fires, and more drought years.¹ Secondary effects are likely to include a global rise in sea level, impacts to agriculture, changes in disease vectors, and changes in habitat and biodiversity.

In 2005, in recognition of California's vulnerability to the effects of climate change, Governor Schwarzenegger established Executive Order S-3-05, which sets forth a series of target dates by which statewide emission of greenhouse gases (GHG) would be progressively reduced, as follows: by 2010, reduce GHG emissions to 2000 levels; by 2020, reduce GHG emissions to 1990 levels; and by 2050, reduce GHG emissions to 80 percent below 1990 levels. In 2006, California passed the California Global Warming Solutions Act of 2006 (AB 32), which requires the California Air Resources Board (CARB) to design and implement emission limits, regulations, and other measures, such that feasible and cost-effective statewide GHG emissions are reduced to 1990 levels by 2020 (representing a 25 percent reduction in emissions).

In April 2009, the California Office of Planning and Research published proposed revisions to the California Environmental Quality Act to address GHG emissions. The amendments to CEQA indicate the following:

- Climate action plans and other greenhouse gas reduction plans can be used to determine whether a project has significant impacts, based upon its compliance with the plan.

¹ California Air Resources Board (ARB), 2006, Climate Change website. (<http://www.arb.ca.gov/cc/120106workshop/intropres12106.pdf>).

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

- Local governments are encouraged to quantify the greenhouse gas emissions of proposed projects, noting that they have the freedom to select the models and methodologies that best meet their needs and circumstances. The section also recommends consideration of several qualitative factors that may be used in the determination of significance, such as the extent to which the given project complies with state, regional, or local GHG reduction plans and policies. OPR does not set or dictate specific thresholds of significance. Consistent with existing CEQA Guidelines, OPR encourages local governments to develop and publish their own thresholds of significance for GHG impacts assessment.
- When creating their own thresholds of significance, local governments may consider the thresholds of significance adopted or recommended by other public agencies, or recommended by experts.
- New amendments include guidelines for determining methods to mitigate the effects of greenhouse gas emissions in Appendix F of the CEQA Guidelines.
- OPR is clear to state that "to qualify as mitigation, specific measures from an existing plan must be identified and incorporated into the project; general compliance with a plan, by itself, is not mitigation."
- OPR's emphasizes the advantages of analyzing GHG impacts on an institutional, programmatic level. OPR therefore approves tiering of environmental analyses and highlights some benefits of such an approach.
- Environmental impact reports (EIRs) must specifically consider a project's energy use and energy efficiency potential.

On December 30, 2009, the Natural Resources Agency adopted the proposed amendments to the CEQA Guidelines in the California Code of Regulations.

In December 2009, the San Joaquin Valley Air Pollution Control District (SJVAPCD) adopted guidance for addressing GHG impacts in its *Guidance for Valley Land Use Agencies in Addressing GHG Impacts for New Projects Under CEQA*. The guidance relies on performance-based standards, otherwise known as Best Performance Standards (BPS), to assess significance of project-specific GHG emissions on global climate change during the environmental review process. Projects can reduce their GHG emission impacts to a less than significant level by implementing BPS. Projects can also demonstrate compliance with the requirements of AB 32 by demonstrating that their emissions achieve a 29% reduction below "business as usual" (BAU) levels. BAU is a projected GHG emissions inventory assuming no change in existing business practices and without considering implementation of any GHG emission reduction measures.

Significance Criteria

The SJVAPCD's *Guidance for Valley Land Use Agencies in Addressing GHG Impacts for New Projects Under CEQA* provides initial screening criteria for climate change analyses, as well as draft guidance for the determination of significance.

The effects of project-specific GHG emissions are cumulative, and therefore climate change impacts are addressed as a cumulative, rather than a direct, impact. The guidance for determining significance of impacts has been developed from the requirements of AB 32. The guideline addresses the potential cumulative impacts that a project's GHG emissions could have on climate change. Since climate change is a global phenomenon, no direct impact would be identified for an individual land development project. The following criteria are used to evaluate whether a project would result in a significant impact for climate change impacts:

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

- Does the project comply with an adopted statewide, regional, or local plan for reduction or mitigation of GHG emissions? If no, then
- Does the project achieve 29% GHG reductions by using approved Best Performance Standards? If no, then
- Does the project achieve AB 32 targeted 29% GHG emission reductions compared with BAU?

Projects that meet one of these guidelines would have less than significant impact on the global climate.

Because BPS have not yet been adopted and identified for specific development projects, and because neither the ARB nor the City of Clovis has not yet adopted a plan for reduction of GHG with which the Project can demonstrate compliance, the goal of 29% below BAU for emissions of GHG has been used as a threshold of significance for this analysis.

A global climate change evaluation was performed by Scientific Resources Associated, dated April 8, 2015. The evaluation concluded that the project is consistent with the goals of the ARB and impact is less than significant.

Checklist Discussion

a) Less Than Significant Impact. A significance threshold of 29% below "business as usual" levels is considered to demonstrate that a project would be consistent with the goals of AB 32. A global climate change evaluation was performed by First Carbon Solutions, dated August 13, 2014. The study concludes that impacts related to conflicts with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases is less than significant.

b) Less Than Significant Impact. A Global Climate Change Evaluation was prepared for the Project by First Carbon Solutions. The evaluation addresses the potential for greenhouse gas emissions during construction and after full build out of the proposed Project.

GHG emissions were calculated for BAU conditions and for conditions with implementation of GHG emission reduction project design features proposed by the Project applicants. The study concludes that the proposed Project would not result in any direct impacts to the global climate, and cumulative impacts would be less than significant.

CONCLUSIONS RELATING TO GREENHOUSE GAS EMISSIONS

The Project would not contribute significantly to global climate change and would not impede the State's ability to meet its greenhouse gas reduction targets under AB 32. Current and probable future state and local greenhouse gas reduction measures will continue to reduce the Project's contribution to climate change. An example includes the regulations and programs of the SJUAPCD required to reduce impacts on air quality, which also have the effect of reducing greenhouse gas emissions. As a result, the Project would not contribute significantly, either individually or cumulatively, to global climate change. Therefore, with mitigations included, the GHG emissions of this Project are less than significant.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.8 HAZARDS AND HAZARDOUS MATERIALS				
<i>Will the Project:</i>				
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f. For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
h. Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

ENVIRONMENTAL SETTING

The General Plan Public Safety Element Policy 2.1 was adopted to reduce the potential safety risks associated with hazardous materials and urban development. Furthermore, the General Plan EIR Safety Section instituted Mitigation Measures 1-8 that reduce potential impacts to a less than significant level by requiring buffers between potential hazards and sensitive receptors, and requiring cooperation between the City and other government regulatory agencies. The proposed Project does not involve activities related to the handling or transport of hazardous materials other than substances to be used during construction. The Project does not involve the construction or operation of hazardous material facilities.

Further, the Project site is not listed as part of the State of California's Hazardous Waste and Substances Site List. Field review by City staff did not identify any obvious signs of contamination.

The reader is referred to Section 3.2 (Geology/Soils) for information regarding impacts associated with geologic and seismic hazards, Section 3.3 (Water) for information regarding impacts associated with water quality and flooding, and Section 3.4 (Air Quality) regarding air quality hazards.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

The Project may result in significant hazards if it:

- 1) Creates potential public health hazards;
- 2) Involves the use, production, disposal, or upset (accidents) of materials which pose a hazard to people in the area; interferes with emergency response plans or emergency evacuation plans; or,
- 3) Violates applicable laws intended to protect human health and safety or would expose employees to working situations that do not meet health standards.

Checklist Discussion

a) No Impact. Based on field review, no signs of potential contamination or hazardous materials were identified. Thus, no hazard issues are expected with this development of this site. Any hazardous materials used would be required to comply with all applicable local, state, and federal standards associated with the handling of hazardous materials. Therefore, there are no impacts anticipated in the category.

b) Less than Significant Impact. Construction activities that could involve the release of hazardous materials associated with Project would include maintenance of on-site construction equipment, which could lead to minor fuel and oil spills. The use and handling of hazardous materials during construction activities would occur in accordance with applicable federal, state, and local laws. Therefore, these impacts are considered less than significant.

c) Less than Significant Impact. There is a school facility with daily classes located within one-half (0.5) mile of the Project area. Based on field review, no signs of potential contamination or

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

hazardous materials were identified. Thus, no hazard issues are expected with this development of this site.

d) No Impact. The land within the Project site is not included on a list of hazardous materials sites. The Department of Toxic Substances Control's Hazardous Waste and Substances Site List (Cortese List) does not list any hazardous waste and substances sites within the City of Clovis (www.dtsc.ca.gov/database/Calsites/Cortese_List.cfm).

e) No Impact. The Project site is not located within the Fresno-Yosemite International Airport land use plan or, within two miles of a public airport or public use airport. The proposed Project would not bring about a safety hazard related to an airport or aviation activities for people residing or working in the Project area.

f) No Impact. The Project site is not located within the vicinity of a private airstrip, and would not result in a safety hazard for people residing or working in the Project vicinity related to an airstrip or aviation activities.

g) No Impact. The proposed Project would not impair implementation of, or physically interfere with, an adopted emergency response plan or emergency evacuation plan.

h) No Impact. The Project site is located in an area surrounded by urban uses. As such, the site is not adjacent to or in close proximity to wildland areas. No impacts are anticipated.

CONCLUSIONS RELATING TO AGRICULTURE AND FOREST RESOURCES

The Project is expected to result in less than significant impacts from hazards and hazardous materials.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.9 HYDROLOGY AND WATER QUALITY				
<i>Will the proposal result in:</i>				
a. Violate any water quality standards or waste discharge requirements?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Otherwise substantially degrade water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g. Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

delineation map?				
h. Place within a 100-year flood hazard area structures that would impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
i. Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
j. Inundation by seiche, tsunami, or mudflow?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

ENVIRONMENTAL SETTING

Surface Water and Drainage

The Plan Area is within the drainages of three streams: Dry Creek, Dog Creek, and Redbank Slough. On the north, Dry Creek discharges into the Herndon Canal in the City of Fresno west of Clovis. South of Dry Creek, Dog Creek is a tributary of Redbank Slough, which discharges into Mill Ditch south of Clovis (USGS 2012). A network of storm drains in the City and the Plan Area discharges into 31 retention basins, most of which provide drainage for a one- to two-square-mile area. Most of the Plan Area east and northeast of the City is not in drainage areas served by retention basins. Those areas drain to streams that discharge into reservoirs, including Big Dry Creek Reservoir in the north-central part of the Plan Area and Redbank Creek Dam and Reservoir in the southeast part of the Plan Area. Fancher Creek Dam and Reservoir are near the east Plan Area boundary.

Detention and retention basins in the FMFCD's flood control system are sized to accommodate stormwater from each basin's drainage area in builtout condition. The current capacity standard for FMFCD basins is to contain runoff from six inches of rainfall during a ten-day period and to infiltrate about 75 to 80 percent of annual rainfall into the groundwater basin (Rourke 2014). Basins are highly effective at reducing average concentrations of a broad range of contaminants, including several polycyclic aromatic hydrocarbons, total suspended solids, and most metals (FMFCD 2013). Pollutants are removed by filtration through soil, and thus don't reach the groundwater aquifer (FMFCD 2014). Basins are built to design criteria exceeding statewide Standard Urban Stormwater Mitigation Plan (SUSMP) standards (FMFCD 2013). The urban flood control system provides treatment for all types of development—not just the specific categories of development defined in a SUSMP—thus providing greater water quality protection for surface water and groundwater than does a SUSMP.

In addition to their flood control and water quality functions, many FMFCD basins are used for groundwater recharge with imported surface water during the dry season through contracts with the Fresno Irrigation District (FID) and the cities of Fresno and Clovis; such recharge totaled 29,575 acre feet during calendar year 2012 (FMFCD 2013).

The pipeline collection system in the urban flood control system is designed to convey the peak flow rate from a two-year storm.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

Most drainage areas in the urban flood control system do not discharge to other water bodies, and drain mostly through infiltration into groundwater. When necessary, FMFCD can move water from a basin in one such drainage area to a second such basin by pumping water into a street and letting water flow in curb and gutter to a storm drain inlet in an adjoining drainage area (Rourke 2014). Two FMFCD drainage areas discharge directly to the San Joaquin River, and three to an irrigation canal, without storage in a basin. Six drainage areas containing basins discharge to the San Joaquin River, and another 39 basins discharge to canals (FMFCD 2013).

A proposed development that would construct more impervious area on its project site than the affected detention/retention basin is sized to accommodate is required to infiltrate some stormwater onsite, such as through an onsite detention basin or drainage swales (Rourke 2014).

The Big Dry Creek Reservoir has a total storage capacity of about 30 thousand acre-feet (taf) and controls up to 230-year flood flows. Fancher Creek Dam and Reservoir hold up to 9.7 taf and controls up to 200-year flood flows. Redbank Creek Dam and Reservoir hold up to 1 taf and controls up to 200-year flood flows.

Groundwater

Clovis is underlain by the Kings Groundwater Basin that spans 1,530 square miles of central Fresno County and small areas of northern Kings and Tulare counties. Figure 5.9-4, *Kings Groundwater Basin*, shows that the basin is bounded on the north by the San Joaquin River, on the west by the Delta-Mendota and Westside Subbasins, the south by the Kings River South Fork and the Empire West Side Irrigation District, and on the east by the Sierra Nevada foothills. Depth to groundwater in 2012 ranged from 160 feet along the west City boundary to 70 feet at the east City boundary, 25 feet at the southeast SOI boundary, and about 20 feet at the eastern Plan Area boundary (FID 2013). The Kings Subbasin has been identified as critically overdrafted (Provost & Pritchard 2011).

In the Plan Area, groundwater levels are monitored by the City of Clovis and FID. The area has not experienced land subsidence due to groundwater pumping since the early 1900s (FID 2006). Subsidence occurs when underground water or natural resources (e.g., oil) are pumped to the extent that the ground elevation lowers. No significant land subsidence is known to have occurred in the last 50 years as a result of land development, water resources development, groundwater pumping, or oil drilling (FID 2006). Regional ground subsidence in the Plan Area was mapped as less than one foot by the US Geological Survey in 1999 (Galloway and Riley 1999). However, groundwater levels in the San Joaquin Valley are forecast to hit an all-time low in 2014 (UCCHM 2014).

Groundwater Recharge

New development in accordance with the General Plan Update would increase the amount of impervious surface in the Plan Area, potentially affecting the amount of surface water that filters into the groundwater supply. Groundwater levels are monitored in the Plan Area by the FID and the City of Clovis. As described in the 2010 City of Clovis Urban Water Management Plan (UWMP), groundwater recharge occurs both naturally and artificially throughout the City. The Kings Groundwater Basin area is recharged through a joint effort between the Cities of Clovis and Fresno and the FID (CDWR 2006). Approximately 8,400 acre-feet per year (afy) of water are intentionally recharged into the Kings Groundwater Basin by the City of Clovis, and

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

approximately 7,700 acy of water naturally flow into groundwater in the City's boundaries (Clovis 2011).

The FMFCD urban stormwater drainage system would provide groundwater infiltration for runoff from developed land uses in detention basins in the drainage system service area. The process of expansion of the FMFCD urban storm drainage system is explained above under the analysis of the 2035 Scenario under Impact 5.9-1.

Projects pursuant to the proposed General Plan Update and developed outside of the FMFCD urban stormwater drainage system would be required to meet the requirements of NPDES regulations, including the implementation of BMPs to improve water retention and vegetation on project sites.

Executive Order to Reduce Water Use

The new Clovis General Plan PEIR indicates that the City would have adequate water supply to meet the demand of planned development through the 2035 planning horizon. The current drought situation through mid-2014 was considered and addressed in the General Plan PEIR.

The most recent drought developments, including the Governor's April 1, 2015 executive order and the resulting State Water Resources Board requirement that urban water users reduce water use by at least 25 percent (36 percent for the City of Clovis), is being implemented by the City of Clovis through a number of measures. These measures include:

- Establishment of mandatory reductions for all users and implementation of penalties for failure to comply
- Restriction of outdoor water use to two days per week
- Increased enforcement of water conservation rules
- Reducing water use on City landscaping by at least 36 percent below 2013 levels
- Relaxing enforcement of all neighborhood preservation ordinances that could require ongoing landscape irrigation
- Increased public outreach
- Consideration of revisions to rules and rates for water haulers CCMC would have to comply with the mandatory restrictions.

It is noted that the Project will use recycled water for its public landscaping. Since the residents within the Project are subject to and will comply with water use reduction requirements, the Project would not result in any significant adverse impacts related to water supply and quality or a substantial increase in the severity of the impacts identified in the Program EIR.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

The proposed Project may result in significant impacts if it would violate any water quality standards or waste discharge requirements; substantially deplete groundwater supplies or interfere substantially with ground water recharge; substantially alter the existing drainage pattern if the site; substantially increase the rate or amount of surface runoff; exceed the existing or planned storm water drainage system; provide substantial additional sources of polluted runoff; degrade water quality; place housing or structures within a 100-year flood hazard area; expose people or structures to risks of flooding; and inundation from seiche, tsunami, or mudflow.

The General Plan Program Environmental Impact Report identified significant and unavoidable impacts for both the 2035 scenario and full build-out of the General Plan Area and statement of overriding considerations was adopted.

In a study dated August 22, 2014, Provost and Pritchard analyzed the conversion of Agriculture designated land to Medium Residential. The study concluded that because the site is located within the FID, which has adequate water to accommodate the Project, impacts are less than significant.

Checklist Discussion

- a) Less than Significant Impact.** Development of the Project site would be required to comply with all City of Clovis ordinances and standard practices which assure proper grading and storm water drainage into the approved storm water systems. The Project would also be required to comply with Fresno County Health Department requirements, FMFCD regulations, and all local, state, and federal regulations to prevent any violation of water quality standards or waste discharge requirements. This project would not violate any water quality standards or waste discharge requirements.
- b) Less than significant Impact.** The Project would not deplete groundwater supplies or interfere with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level due to the Project. The General Plan Program EIR identified a net decrease in ground water aquifer throughout the region, however, because the City's domestic water system is primarily served through surface water via existing water entitlements, the loss of aquifer is less than significant. The City has developed a surface water treatment plant (opened in June, 2004) that reduces the need for pumped groundwater, and has also expanded the municipal groundwater recharge facility. The Projects impacts to groundwater are less than significant.
- c) Less than significant Impact.** The Project would not alter the existing drainage pattern of the site or area through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on or off-site. Therefore, impacts are less than significant.
- d) Less than significant Impact.** The Project would not alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on or off-site. Therefore, impacts are less than significant.
- e) f) Less than Significant Impact.** The proposed Project would add insignificant amounts of new impervious surfaces. These new surfaces would not significantly change absorption rates or drainage patterns that would result in a significant impact. Construction-related activities could

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

result in degradation to water quality. Construction activities typically involve machines that have the potential to leak hazardous materials that may include oil and gasoline.

It is expected that the developer or its contractors will use standard containment and handling protocols to ensure that these vehicles do not leak any material that might harm the quality of local surface or groundwater. In addition, improper use of fuels, oils, and other construction related hazardous materials may also pose a threat to surface or groundwater quality. However, the Project will have to comply with Environmental Measure 2: Erosion Control Measures to Project Water Quality, Environmental Measure 5: Measures to Minimize Exposure of People and the Environment to Potentially Hazardous Materials, and with Clovis Municipal Code Chapter 6.7 Urban Storm Water Quality Management and Discharge Control. These measures will reduce impacts to a less than significant level.

g) Less than Significant Impact with Mitigation. The Project could place housing within a 100-year flood hazard area as mapped on the latest federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map. The Fresno Metropolitan Flood Control District has policies in place to address projects within a 100-year flood hazard area. The FMFCD has noted that this project may be located in a 100-year flood area, and would be subject to the District policies to reduce impacts to a less than significant level.

h) Less than Significant Impact with Mitigation. The Project could place within a 100-year flood hazard area structures that would impede or redirect flood flows. The Fresno Metropolitan Flood Control District has policies in place to address projects within a 100-year flood hazard area. The FMFCD has noted that this project may be located in a 100-year flood area, and would be subject to the District policies to reduce impacts to a less than significant level.

i) No Impact. The Project would not expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam.

j) No Impact. The Project is not located near any ocean, coast, or seiche hazard areas and would not involve the development of residential or other sensitive land uses. Therefore, the Project would not expose people to potential impacts involving seiche or tsunami. No potential for mudflows is anticipated. There is no impact associated with the proposed Project.

Mitigation measure 3.9-g&h

1. All proposed development activity shall reference the Flood Insurance Rate Map to determine if it is located in a 100-year flood plain (special flood hazard areas inundated by a 100-year flood) "Primary Flood Plain". Any project not located within a FIRM or located in any area where the FIRM is determined to be inaccurate shall be the subject of a detailed hydrological flood hazard investigation to determine the relationship of the proposed development to the primary flood plain; and, further, to identify the calculated water surface elevation of the 100-year flood event.
2. The development must be properly flood proofed below the calculated water surface elevation of the 100-year flood event.
3. All development and/or permanent improvement activity which, if located within the primary floodway, may unduly impede, retard or change the direction of flow of water either, by itself, or by the catching or collecting of other debris or is placed where the

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

flow of water would carry such obstruction downstream to the damage or detriment of either life or property, should not be permitted.

4. The development shall not cause displacement of any and all floodwaters from that portion of the flood plain to be developed.

CONCLUSIONS RELATING TO AGRICULTURE AND FOREST RESOURCES

The proposed Project would result in a less than significant impact to hydrology and water quality resources with the following mitigations measures incorporated.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.10 LAND USE AND PLANNING				
<i>Will the proposal:</i>				
a. Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but no limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Conflict with any applicable habitat conservation plan or natural community conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

ENVIRONMENTAL SETTING

The Project is consistent with the land use policies of the City, including the Clovis General Plan and Zoning Ordinance; therefore impacts in this category are avoided.

Significance Criteria

The proposed Project may result in significant impacts if it physically divides an established community, conflicts with existing off-site land uses, causes substantial adverse change in the types or intensity of existing or planned land use patterns, or conflicts with any applicable City land use plan, policy or regulation.

Checklist Discussion

- a) **No Impact.** The proposed Project will not physically divide an established community.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

b) Less than Significant. The proposed Project is requesting to amend the General Plan to re-designate the project site from Agriculture to Medium Residential. Although this is a change which is not consistent with the General Plan's Land Use Diagram, the project is consistent with the continued urbanization of the Loma Vista Specific Plan. Therefore impacts in this category are less than significant.

c) No Impact. There are no habitat conservation plans or natural community conservation plans within the City of Clovis. Therefore, no impact would occur.

CONCLUSION REGARDING LAND USE AND PLANNING

The proposed Project is not expected to have any land use planning impacts.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.11 MINERAL RESOURCES				
<i>Will the proposal:</i>				
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

ENVIRONMENTAL SETTING

The Clovis General Plan states, "The Clovis Project area does not contain those mineral resources that require managed production, according to the State Mining and Geology Board" (General Plan, Page 6-8).

IMPACTS AND MITIGATION MEASURES

Significance Criteria

The Project would create significant impacts if it results in the loss of availability of a known mineral resource with future value.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

Checklist Discussion

a) b) No Impact. The proposed Project would not use or extract any mineral or energy resources and would not restrict access to known mineral resource areas. Therefore, the Project would have no impact on mineral resources.

CONCLUSIONS RELATING TO ENERGY AND MINERAL RESOURCES

The proposed Project would have no impact on mineral and energy resources.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.12 NOISE				
<i>Will the proposal result in:</i>				
a. Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

ENVIRONMENTAL SETTING

The ambient noise environment in the immediate Project vicinity is defined primarily by local traffic. The General Plan Noise Element sets forth land use compatibility criteria for various community noise levels. These criteria are shown in Table 8-3 of the Noise Element. The Noise Element specifies that residential land uses are considered normally acceptable in exterior noise levels of up to 65 CNEL without the need for noise mitigation.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

CEQA guidelines, the City of Clovis General Plan Noise Element, and the Clovis Development Code have been used to establish impact standards for this section. Implementation of the Project would result in significant noise impacts if the Project would result in the following:

- 1) Exposure of persons to or generation of noise levels in excess of standards established in the City of Clovis General Plan and Development Code. For this Project, the standards to be applied are 65 CNEL at existing residences in the Project vicinity, and 65 CNEL for the park area.

Checklist Discussion

a) Less than Significant. The construction of the proposed Project would result in temporary construction-related noise impacts. Construction noise would be short-term in nature and only occur for a limited duration. These impacts have been addressed in the General Plan and with the Clovis Municipal Code restrictions on hours of construction, temporary noise would be less than significant.

b) Less than Significant. Potential groundborne vibration or groundborne noise levels would most likely occur as part of construction activities associated with the Project. The construction activities would be temporary in nature and no persons would be exposed to these for extended periods of time. Therefore, impacts associated with exposure to, or generation of, groundborne vibration or noises are considered to be less than significant.

c) Less Than Significant. The proposed Project could result in a permanent increase in the ambient noise levels due to increased traffic, population and equipment related to a multiple-family development. Noise was previously evaluated with the General Plan. The proposed Project is consistent with the General Plan.

d) Less than Significant. A temporary increase in ambient noise levels would occur in association with construction activities. However, construction noise would be short-term in nature and only occur for a limited duration. Therefore, impacts are considered less than significant.

e) Less than significant. The proposed Project site is not located within an airport land use plan area. The proposed Project site is approximately one mile north of the Fresno Yosemite International Airport. The project site sits outside of the 60-65 CNEL noise contour of the airport. Therefore, the Project would not expose people to excessive airport or airstrip noise.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

f) **No Impact.** The Project is not located within the vicinity of a private airstrip.

CONCLUSIONS RELATING TO NOISE

The proposed Project would create temporary construction noise impacts, but are considered less than significant.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.13 POPULATION AND HOUSING				
<i>Would the Project:</i>				
a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

ENVIRONMENTAL SETTING

The proposed Project will generate or result in increased population in the area. The project includes a 112-lot planned unit development. The number of new residents in the area would equal approximately 302 residents.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

The Project may result in significant impacts if it induces substantial growth, displaces a large number of people, or contributes to a job-housing imbalance.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

Checklist Discussion

a) Less than Significant. The Project could add 112 units to the area equating to approximately 302 new residents. It is anticipated that this development would introduce a number of new citizens to the City of Clovis, however according to a letter dated June 12, 2014, from the Clovis Unified School District, the impact is less than significant.

b) No Impact. The Project would not result in displacement of housing.

c) No Impact. The Project would not result in displacement of people.

CONCLUSIONS RELATING TO POPULATION AND HOUSING

The proposed Project would not result in significant impacts to population and housing.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.14 PUBLIC SERVICES				
Would the Project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a. Fire protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Police protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

ENVIRONMENTAL SETTING

The Project would not result in a significant increased demand for public services. The Project is consistent with the Clovis General Plan and associated utility planning documents; therefore impacts in this category are not anticipated to be significant.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

The Project may result in significant public service impacts if it substantially and adversely alters the delivery or provision of fire protection, police protection, schools, facilities maintenance, and other governmental services.

Checklist Discussion

a) Fire protection. Less Than Significant Impact. The Project would have a less than significant increase in demand for fire protection services. In the event that a fire occurs during construction, the Clovis Fire Department would respond. However, no additional personnel or equipment would be needed as a result of the Project. Therefore, impacts to fire services are considered less than significant.

b) Police protection. Less Than Significant Impact. The project is located at the southeast edge of the City and will be a gated community within the Community Facilities District (CFD). The CFD is an assessment district designed to provide additional funding for safety services for residential development in Clovis' growth areas. The Police Department states that they may not be able to meet their goal to provide superior protection and service and response times will be increased due to its proximity. The project will be gated and managed by a homeowner's association. Additionally, new streets will provide connections between major streets and street lights will provide additional security. Although service time may be increased, impacts in this category are less than significant.

c) Schools. Less than Significant Impact. The Project site is located within the Clovis Unified School District. The Clovis Unified School District does levies a fee for residential facilities because it has been determined that these types of facilities do not impact schools. According to a letter from the Clovis Unified School District, date September 22, 2014, the District can accommodate the new students.

d) Parks. Less than significant impact. Development of this site with 112- single-family homes will introduce new residents to the community. The Parks and Recreation Element of the General Plan requires a specific ratio of park area to residents. A park impact fee is required for each new unit and is then used to construct community parks to meet these goals. The impacts in this category are less than significant since all units built in this subdivision will contribute to the park funds.

e) Other public facilities. Less than significant impact. The Project would not have a less than significant impacts on other public facilities.

CONCLUSIONS RELATING TO PUBLIC FACILITIES

The proposed Project would not result in significant impacts to public services.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	
3.15 RECREATION					
<i>Will the proposal:</i>					
a.	Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b.	Does the project include recreational facilities or require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

ENVIRONMENTAL SETTING

The proposed Project includes 144 new residential units.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

The Project may create significant impacts if it creates demand for new expanded parks and recreation facilities, or substantially affects existing recreational opportunities.

Checklist Discussion

a) Less Than Significant Impact. The proposed Project would not create new demand for any type of recreational facilities that were no already identified in the parks and recreation Element of the General Plan. The General Plan requires that all development contribute a proportionate share toward the development of parks throughout the community.

b) No Impact. The Project does not include recreational facilities or facilities which might have an adverse physical effect on the environment.

CONCLUSIONS RELATING TO RECREATION

The Project would have a less than significant impact to recreation.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.16 TRANSPORTATION/CIRCULATION				
<i>Will the proposal result in:</i>				
a. Exceed the capacity of the existing circulation system, based on an applicable measure of effectiveness (as designed in a general plan policy, ordinance, etc.), taking into account all relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Result in a change in traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Result in inadequate emergency access?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

ENVIRONMENTAL SETTING

Roadways are the primary existing transportation facilities in the vicinity of the Project area. Although, non-automobile travel does occur in the area, separate facilities for transit, bicycles, or pedestrians are limited.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

The Project may result in significant transportation/circulation impacts if it:

- 1) Causes an increase in traffic which is substantial in relation to the existing traffic loads and capacity of the road system that are inconsistent with adopted standards;
- 2) Creates traffic conditions which expose people to traffic hazards;
- 3) Substantially interferes or prevents emergency access to the site or surrounding properties;
- 4) Conflicts with adopted policies or plans for alternative transportation.

Checklist Discussion

- a) **Less than Significant.** The site is currently designated Agriculture and has historically been farmed. The Project proposal includes a 112 lot single-family development. New traffic will be introduced to the area as a result of the Project. KD Anderson & Associates, Traffic Engineers, analyzed the Project and concluded that the current and proposed improvements with the project can accommodate the additional traffic, and that impacts are considered less than significant.
- b) **Less than Significant.** KD Anderson & Associates, Traffic Engineers, analyzed the Project and concluded that the current and proposed improvements with the project can accommodate the additional traffic, and that impacts are considered less than significant.
- c) **Less Than Significant Impact.** The proposed Project may result in a temporary change in traffic patterns due to construction; however, the Project will be required to comply with Section 7.15 Traffic Control, Public Convenience, and Safety of the Clovis Standard Specification and Standard Drawings will reduce impacts to a less than significant level.
- d) **Less Than Significant Impact.** The City Engineer states that the location of drive access points are adequate in addressing the City Standards and has determined that impacts in this category are less than significant.
- e) **Less Than Significant Impact.** The Project may result in short term delayed emergency response due to its proximity to existing Fire Stations. The development is located in a growth area which is anticipated for at least one additional Fire Station to be located approximately one mile to the north. Upon full build-out of Loma Vista, response times are anticipated to be at preferred levels. Impacts are considered less than significant.
- f) **No Impact.** The Project will not conflict with adopted policies, plans, or programs supporting alternative transportation.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

CONCLUSIONS RELATING TO TRAFFIC AND CIRCULATION

The Project will increase the volume of traffic expected to be generated at the Project site. However, the anticipated levels of service, delays, and queuing conditions with the Project are very similar to those anticipated without the Project, and the increase in traffic does not significantly alter the conditions anticipated in the City's current General Plan.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.17 UTILITIES AND SERVICE SYSTEMS				
<i>Will the proposal:</i>				
a. Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Result in a determination by the wastewater treatment provider that serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f. Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g. Comply with federal, state, and local statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

ENVIRONMENTAL SETTING

Pacific Gas & Electric (PG&E) provides electricity and natural gas services in the City of Clovis. AT&T/SBC provides telephone service to the City.

The City's water supply sources include groundwater drawn from the Kings Sub-basin of the San Joaquin Valley Groundwater Basin and treated surface water from the Fresno Irrigation District (MID). Surface water is treated at the City of Clovis Surface Water Treatment Facility.

The City of Clovis provides sewer collection service to its residents and businesses. Treatment of wastewater occurs at the Fresno-Clovis Regional Wastewater Treatment Plant (RWTP). The Fresno-Clovis RWTP is operated and maintained by the City of Fresno and operates under a waste discharge requirement issued by the Central Valley Regional Water Quality Control Board. Additionally, the City of Clovis has completed a 2.8 mgd wastewater treatment/water reuse facility, which will service the City's new growth areas.

The Fresno Metropolitan Flood Control District (FMFCD) has the responsibility for storm water management within the Fresno-Clovis metropolitan area of the Project site. Stormwater runoff that is generated by land development is controlled through a system of pipelines and storm drainage detention basins.

IMPACTS AND MITIGATION MEASURES

Significance Criteria

As identified in the checklist above, the Project may result in significant impacts on utilities and service systems if it substantially and adversely alters the delivery of utilities or substantially increases the demand for utilities.

Checklist Discussion

- a) **Less than Significant Impact.** According to a memo from the City Engineer, dated August 22, 2014, the wastewater impacts were evaluated in accordance with the Waste Water master Plan. The City Engineer concludes that although the Project is proposing to increase the density, the Project will not exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board. Impacts are considered less than significant.
- b) **No Impact.** The Project will not result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects.
- c) **Less than Significant Impact.** The Project may result in the construction of new storm water drainage facilities. Conversion to a higher density residential category may induce more storm run-off into the master planned system. The Fresno Metropolitan Flood Control District has policies for this type of conversion. According to a letter from the FMFCD dated August 22, 2014, the district can accommodate the proposed project.

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

d) Less than Significant Impact. According to a study performed by Provost and Pritchard, dated August 22, 2014, the Project will not require new or expanded entitlements and resources. The site is also within the Fresno Irrigation District and will turn over the water rights to the City of Clovis upon development.

e) No Impact. The Project will not require a determination by a wastewater treatment provider (see item b above).

f) Less than Significant Impact. According to the Solid Waste Division, the Project will not significantly impact the designated landfill.

g) No Impact. The Project will comply with federal, state, and local statutes as well as regulations related to solid waste by the City of Clovis.

CONCLUSIONS RELATING TO UTILITIES AND SERVICE SYSTEMS

Impacts to utilities and service systems will be less than significant.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3.18 MANDATORY FINDINGS OF SIGNIFICANCE				
a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3.0 ENVIRONMENTAL SETTING, IMPACTS AND MITIGATION MEASURES

- a) **Less Than Significant.** Based on the analysis provided in Initial Study the project does not have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal.
- b) **Less Than Significant.** Based on the analysis provided in this Initial Study, the project would not result in any significant cumulative impacts relative to other current projects, or the effects of probable future projects.
- c) **Less Than Significant.** Based on the analysis provided in Initial Study, the project will not have environmental effects that will cause substantial adverse effects on human beings.

4.1 CUMULATIVE IMPACTS

INTRODUCTION

This section addresses the Project's potential to contribute to cumulative impacts in the region. CEQA Guidelines Section 15355 defines cumulative impacts as "two or more individual effects that, when considered together, are considerable or which compound or increase other environmental impacts." The individual effects may be changes resulting from a single project or separate projects. The cumulative impact from several projects is the change in the environment that results from the incremental impact of the Project when added to other closely related past, present, and reasonably foreseeable future projects. Cumulative impacts can result from individually minor yet collectively significant projects taking place over a period of time.

CUMULATIVE SETTING

The cumulative setting for the proposed Project is the build-out of the City of Clovis General Plan.

CUMULATIVE IMPACT ANALYSIS

Aesthetics

The proposed Project is not expected to result in significant cumulative visual resource impacts with mitigation.

Agriculture and Forest Resources

The proposed Project would not substantially contribute to the conversion of agricultural land or forest land to urban or other uses. There are no forest lands in the adjacent to or in the immediate vicinity. Therefore, the Project would result in a less than significant cumulative agricultural or forest resources impacts

Air Quality

Implementation of the Project would not result in cumulative short-term construction air quality impacts associated with increased emissions. Additionally, the operation of the Project would not result in significant cumulative air quality impacts to the region and would not result in a significant increase of air quality impacts. Therefore, the Project would result in less than significant cumulative air quality impacts.

Biological Resources

The Project could result in significant impacts to nesting migratory and nongame birds with mitigation. The Project would have a less than significant impact to cumulative biological resources with mitigation measures incorporated.

Cultural Resources

The proposed Project is not anticipated to contribute to any potential impacts related to cultural and/or paleontological impacts. Therefore, the Project would have a less than significant impact to cumulative cultural resources.

4.0 CUMULATIVE IMPACTS

Geology and Soils

Project impacts associated with geology and soils would be site-specific and implementation of the Project would not contribute to cumulative seismic hazards. Therefore, the Project would create no impact to cumulative geophysical conditions.

Greenhouse Gas Emissions

As discussed under Section 3. Greenhouse Gas Emissions, implementation of the proposed Project would contribute to GHG emissions, which is inherently a cumulative issue. The emissions from construction would be short-term (during construction) as a result of various fossil fuel-based construction equipment. Since these impacts are short-term and the contributions to GHG emissions would be minor when compared to the State's GHG emissions target of 427 MMTCO₂-eq by 2020, the construction related greenhouse gas emissions of this Project would be considered a less than significant cumulative impact.

The operational emissions from the Project would be as the result of indirect emissions from electricity usage of the well pump, emissions resulting from the occasional operation of the emergency back-up diesel generator when the power fails, and emissions from maintenance vehicles. These emissions would not be substantial and are considered less than significant. The Project's related GHG emissions would not contribute significantly to global climate change and would not impede the State's ability to meet its greenhouse gas reduction targets under AB 32.

Hazards & Hazardous Materials

The proposed Project is not expected to have significant impacts as the result of hazards or hazardous materials; therefore, the Project is expected to have a less than significant impact to cumulative hazards and hazardous materials impacts.

Hydrology/Water Quality

The proposed Project would not contribute to cumulative surface water quality impacts associated with construction and operational activities. As described in Section 3.3 Hydrology/Water Quality, The proposed Project would not substantially alter the direction of groundwater flows, or result in a substantial change in the quantity of groundwater. The Project would have a less than significant impact to cumulative water conditions.

Land Use Planning & Population/Housing

With the implementation of the mitigation measures identified in Sections 3.1 (Aesthetics), land use impacts would be less than significant. The Project will not have significant impacts to housing or population. The proposed Project is not expected to result in substantial cumulative impacts to land use planning, population or housing, given the limited effects.

Mineral Resources

The proposed Project is expected to have no impact to any site-specific mineral resources; therefore, the Project is expected to have a less than significant impact to cumulative mineral resource impacts.

Noise

As described in Section 3.9 Noise, the Project could result in site-specific noise impacts. These impacts would not contribute to any cumulative noise issues and the Project would have less than significant impacts on cumulative noise conditions.

Public Services

The proposed Project would not result in significant impacts to public services. Therefore, the Project would have less than significant to cumulative public services conditions.

Recreation

The proposed Project would not result in significant impacts to recreation uses and/or resources. Thus, a less than significant impact to recreation is anticipated.

Transportation/Circulation

The proposed Project would not contribute to short-term or long-term traffic congestion impacts. The proposed Project is not expected to impact cumulative transportation/circulation conditions. Therefore, the Project would have a less than significant impact on cumulative transportation and circulation conditions.

Utilities and Service Systems

The proposed project would not have a significant cumulative impact on utility and service system demands.

5.0 DETERMINATION

5.1 ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this Project, as indicated by the checklist and corresponding discussion in this Initial Study.

The environmental factors checked below would be potentially affected by this Project. None of these factors represents a "Potentially Significant Impact" as indicated by this Initial Study.

5.2 DETERMINATION FINDINGS

Based upon staff analysis and comments from experts, it has been determined that the proposed project could generate some limited adverse impacts in the areas of Aesthetics, Agriculture and Forest Resources , Air Quality, Biological Resources, Cultural Resources, Greenhouse Gas Emissions, Hazards & Haz Materials, Hydrology, Land Use Planning, Water Quality, Noise, Population / Housing, Public Services, Recreation , Transportation/Traffic, and Utilities / Service Systems. None of these impacts are anticipated to exceed the impacts addressed in the Clovis General Plan and its associated Program Environmental Impact Report.

The potential impacts identified in this Initial Study are considered to be less than significant since they will cease upon completion of construction, or do not exceed a threshold of significance. Therefore, a Mitigated Negative Declaration is the appropriate level of documentation for this project.

According to the analysis in this Initial Study, based on substantial evidence in the public record, the City of Clovis finds:

- This Initial Study, prepared pursuant to CEQA Section 15063, has identified potentially significant environmental effects that would result from the project.
- The City has reviewed the proposed project impacts and has determined the following mitigation measures will address the identified impacts and reduce impacts to the level required by applicable standards:
 - **3.1-d** The developer shall direct all lighting downward and provide physical shields to prevent direct view of the light source from adjacent residential properties.
 - **3.4-a**
 1. To prevent impacts to Migratory Bird Treaty Act-protected birds and their nests, removal of trees will be limited to only those necessary to construct the proposed project.

2. For trees that must be removed to construct the proposed project, the applicant will target the removal of trees to occur outside the nesting season between September 1st and February 28th. If trees cannot be removed outside the nesting season, pre-construction surveys will be conducted prior to tree removal to verify the absence of active raptor nests within 76 meters (250 feet) of construction activities.
3. If construction or tree removal is proposed during the breeding/nesting season for local avian species (typically March 1st through August 31st), a focused survey for active nests of raptors and migratory birds within and in the vicinity of (no less than 76 meters [250 feet] outside the project boundaries, where possible) the project site shall be conducted by a qualified biologist. Two surveys will be conducted, at least 1 week apart, with the second survey occurring no more than 2 days prior to tree removal. If no active nests are found, tree removal or construction activities may proceed.
4. If an active nest is located during pre-construction surveys, United States Fish and Wildlife Service and/or California Department of Fish and Wildlife (as appropriate) shall be notified regarding the status of the nest. Furthermore, construction activities shall be restricted as necessary to avoid disturbance of the nest until it is abandoned or the biologist deems disturbance potential to be minimal. Restrictions may include establishment of exclusion zones (no ingress of personnel or equipment at a minimum radius of 30 meters (100 feet) around an active raptor nest and a 15-meter (50-foot) radius around an active migratory bird nest) or alteration of the construction schedule.

No action is necessary if no active nests are found or if construction will occur during the non-breeding season (generally September 1st through February 28th).

o **3.9-g&h**

1. All proposed development activity shall reference the Flood Insurance Rate Map to determine if it is located in a 100-year flood plain (special flood hazard areas inundated by a 100-year flood) "Primary Flood Plain". Any project not located within a FIRM or located in any area where the FIRM is determined to be inaccurate shall be the subject of a detailed hydrological flood hazard investigation to determine the relationship of the proposed development to the primary flood plain; and, further, to identify the calculated water surface elevation of the 100-year flood event.
2. The development must be properly flood proofed below the calculated water surface elevation of the 100-year flood event.
3. All development and/or permanent improvement activity which, if located within the primary floodway, may unduly impede, retard or change the direction of flow of water either, by itself, or by the catching or collecting of other debris or is placed where the flow of water would carry such obstruction downstream to the damage or detriment of either life or property, should not be permitted.

4. The development shall not cause displacement of any and all floodwaters from that portion of the flood plain to be developed.

- The City finds that the cumulative impacts of this project are less than significant as described in Section 4.0 (Cumulative Impacts). As such, this project would not generate significant cumulative impacts.
- Feasible mitigation measures have been incorporated to revise the project before the Mitigated Negative Declaration and Initial Study is released for public review pursuant to CEQA Section 15070 in order to avoid or mitigate the identified effects to a point where clearly no significant effects on the environment will occur.
- The City finds that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described above have been added to the project. A MITIGATED NEGATIVE DECLARATION will be prepared.
- As required by CEQA Section 21081.6 et seq., a mitigation monitoring program (Section 6.0) will be adopted by incorporating mitigation measures into the project plan (CEQA Section 21081.6(b)).
- There is no substantial evidence in light of the whole record before the public agency that the project, as revised, may have a significant effect on the environment (CEQA Section 21064.5(2)).
- Based on the above-referenced Initial Study and feasible mitigation measures incorporated to revise the proposed project in order to avoid the effects or mitigate the effects to the point where clearly no significant effect on the environment will occur, staff finds that a Mitigated Negative Declaration should be adopted pursuant to CEQA Section 15070 for the proposed project.

6.0 MITIGATION MONITORING AND REPORTING PROGRAM

6.1 INTRODUCTION

This document is the Mitigation Monitoring and Reporting Program (MMRP) for general plan amendment GPA2015-01, rezone R2015-04, tentative map TM6101, and reorganization R0289. This MMRP has been prepared pursuant to Section 21081.6 of the California Public Resources Code, which requires public agencies to “adopt a reporting and monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment.” A MMRP is required for the proposed project because the Mitigated Negative Declaration has identified significant adverse impacts, and measures have been identified to mitigate those impacts.

The numbering of the individual mitigation measures follows the numbering sequence as found in the Mitigated Negative Declaration.

6.2 MITIGATION MONITORING AND REPORTING PROGRAM

The MMRP, as outlined in the following table, describes mitigation timing, monitoring responsibilities, and compliance verification responsibility for all mitigation measures identified in this Mitigated Negative Declaration.

The City of Clovis will be the primary agency, but not the only agency responsible for implementing the mitigation measures. The MMRP is presented in tabular form on the following pages. The components of the MMRP are described briefly below:

- **Mitigation Measures:** The mitigation measures are taken from the Mitigated Negative Declaration, in the same order that they appear in the Mitigated Negative Declaration.
- **Mitigation Timing:** Identifies at which stage of the project mitigation must be completed.
- **Monitoring Responsibility:** Identifies the department within the City responsible for mitigation monitoring.
- **Compliance Verification Responsibility:** Identifies the department of the City or other State agency responsible for verifying compliance with the mitigation. In some cases, verification will include contact with responsible state and federal agencies.

7.0 REPORT PREPARATION

7.1 REPORT PREPARERS

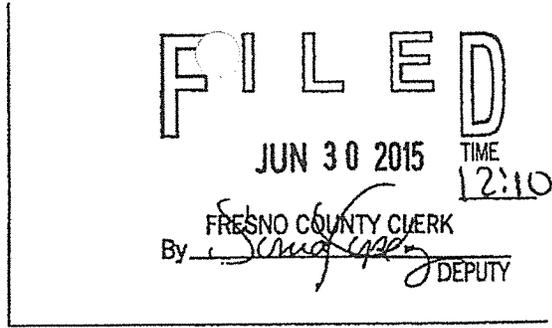

City of Clovis- Lead Agency

Planning Division

Bryan Araki, Project Manager

City of Clovis
Planning and Development
Services
1033 Fifth Street
Clovis CA 93612

DRAFT MITIGATED NEGATIVE DECLARATION E201510000167

Proposed: June 25, 2015
Filed with: Fresno County Clerk
Agency File No: GPA2015-01, R2015-04, TM6101, RO289

Finding: The City of Clovis has determined that the project described below will not have a significant effect on the environment and therefore the preparation of an Environmental Impact Report is not required.

Lead Agency: City of Clovis is the Lead Agency for this project.

Project Title: General Plan Amendment GPA2015-01, Prezone R2015-04, Vesting Tentative Tract Map TM6101, and Reorganization RO289.

Project Location: Southeast intersection of Dakota and Leonard Avenues in Fresno County.

Project Description:

1. A request to consider various items associated with 71.91 acres of property located at the intersection of the Gould Canal and Leonard Avenue. Suzanne Edwards, Melissa Herring, Bradley Mark Phillips, David Harmon, Mark and Terrilynn Pfaff, and Fresno Metropolitan Flood Control District, owners; Tri-Valley Development Group, LLC, applicant.
 - a. Consider Approval Res. 15-___, **GPA2015-01**, A request to re-designate 28.52 acres from Low Residential (2,1 to 4 units per acre) and Agriculture to Medium Residential (4.1 to 7 units per acre).
 - b. Consider Approval Res. 15-___, **R2015-04**, A request to prezone from the County AE20 Zone District to the "R-1-MD" (Single-Family Residential Medium Density), "P-F" (Public Facilities), and "R-1" (Single Family Residential – 6,000 sq. ft. min.) Zone Districts.
 - c. Consider Approval Res. 15-___, **TM6101**, A request to approve a vesting tentative tract map for a 112-lot single-family residential development on approximately 28.52 acres.
 - d. Consider Approval, Res. 15-___, **RO289**, A resolution of application for the annexation of the Territory known as the Leonard-Dakota Northwest Reorganization.

Environmental Assessment: The Initial Study for this project is available for review at the City of Clovis, Planning and Development Services Department, 1033 Fifth Street, Clovis, CA.

Justification for Mitigated Negative Declaration: The City of Clovis has completed the preparation of an Initial Study for the project described above. The Initial Study did not identify any potentially significant environmental effects that would result from the proposed activity. Accordingly, approval of a Mitigated Negative Declaration for the project is recommended. The City finds that the proposed activity can be adequately served by City public services. It will not have a negative aesthetic effect, will not affect any rare or endangered species of plant or animal or the habitat of such species, nor interfere with the movement of any resident or migratory fish or wildlife species. It will not adversely affect water quality, contaminate public water supplies, or cause substantial flooding, erosion, or siltation. It will not have a significant effect on air quality, climate change, transportation or circulation systems, noise, light and glare, and land use. No significant cumulative impacts will occur from this project.

**NOTICE OF INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION
NOTICE OF PUBLIC HEARING
NOTICE OF PUBLIC REVIEW OF A PROPOSED MITIGATED NEGATIVE DECLARATION**

NOTICE IS HEREBY GIVEN that on Thursday, July 23, 2015, at 6:00 p.m., a public hearing will be conducted in the Council Chamber of the Clovis Civic Center, 1033 Fifth Street, Clovis, CA 93612. The Clovis Planning Commission will consider the following items:

1. A request to consider various items associated with 71.91 acres of property located at the intersection of the Gould Canal and Leonard Avenue. Suzanne Edwards, Melissa Herring, Bradley Mark Phillips, David Harmon, Mark and Terrilynn Pfaff, and Fresno Metropolitan Flood Control District, owners; Tri-Valley Development Group, LLC, applicant.
 - a. Consider Approval Res. 15-___, GPA2015-01, A request to re-designate 28.52 acres from Low Residential (2,1 to 4 units per acre) and Agriculture to Medium Residential (4.1 to 7 units per acre).
 - b. Consider Approval Res. 15-___, R2015-04, A request to prezone from the County AE20 Zone District to the "R-1-MD" (Single-Family Residential Medium Density), "P-F" (Public Facilities), and "R-1" (Single Family Residential – 6,000 sq. ft. min.) Zone Districts.
 - c. Consider Approval Res. 15-___, TM6101, A request to approve a vesting tentative tract map for a 112-lot single-family residential development on approximately 28.52 acres.
 - d. Consider Approval, Res. 15-___, RO289, A resolution of application for the annexation of the Territory known as the Leonard-Dakota Northwest Reorganization.

If approved by the Commission, the City Council will consider the Project at their September 8, 2015 meeting.

A Mitigated Negative Declaration has been completed for these projects, pursuant to Section 15070 of CEQA. Recommendation of a proposed Mitigated Negative Declaration does not necessarily mean these projects will be approved. Hard copies and electronic copies of the proposed Mitigated Negative Declaration for this project may be reviewed and/or obtained at the City of Clovis Planning Division, 1033 Fifth Street, Clovis, California, Monday through Friday, between 8:00 a.m. and 3:00 p.m.

All interested parties are invited to comment in writing to the Planning Division by no later than 3:00 p.m. on July 23, 2015, and/or to appear at the hearing described above to present testimony in regard to the above listed requests. Questions regarding these items should be directed to Bryan Araki, Acting Deputy City Planner at (559) 324-2346 or email at bryana@cityofclovis.com.

If you would like to view the Planning Commission Agenda and Staff Reports, please visit the City of Clovis Website at www.cityofclovis.com. Select "Government/Public Documents" and then either "Planning Commission Agenda" or "Planning Commission Reports." The agenda and reports are published to the website 72 hours preceding the Planning Commission meeting.

If you challenge a project in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the City at, or prior to, the public hearing.
